I received a copy of the Cash Guru silver package, in exchange of an honest review.

Basically this package includes copy of the Cash Guru and the bonus method which is Cash Guru+. The normal copy of the Cash Guru is very simple, yet good method of making small amounts of money on a few sites and can get you a pretty good income.

I have seen some of them before, but OP explains them really well and gives you great advice about how to exactly do it so u can make a good amount of money with them.

These are not super detailed, but he has given enough details for you to be able to understand them, and do them.

The cream of the crop is in the Cash Guru+, where he gives a very detailed and good explanation of the method in there.

This method is what is going to make you the big bucks, and he pretty much explains every detail along the way of this method.

This is revolved around a basic concept but he does give you the information you need to be

successful in it and make a killing doing it!

I recommend this method to people who are looking for a decent side income and has the motivation to fulfill this :)

There is a small investment required, it's very small anyone who's purchased eBook can agree on that. It's around \$5-\$10.

For the 1-on-1 mentoring I would be guiding you step by step through each method in this eBook. If you come across any troubles we will work together to come up with a solution. My goal is for you to earn as much \$\$\$ as possible

After a couple of hours? The fuck up. Also, neither of these methods offers the opportunity to payout in BTC, and I'm calling bullshit on the fact that you "purchased BTC with earnings".

I got given a copy of the eBook to review and the first two methods I've seen about 50 times before.

The second method is definitely more interesting, although still a little disappointing in my opinion, especially it's something that everyone is aware of.. selling, the big problem is, WHAT do you sell?

I should probably say that the user tweaked part two of the first method. You're correct, the eBook does not address having BTC as a payout method.

He did earn that \$140 after about 4 hours. Really these methods are simple. Anyone can earn from this!

If anyone who's purchased this eBook want to learn how to earn via BTC please let me know!

Wings of Redemption - August 20, 2017, 8:13 pm

I was fortunate to get a vouch copy and here is my review.

The eBook is clear and concise with images to show every step of the way. The method itself is not something revolutionary, but it is a good way to make money! I have seen something SIMILAR to this on HF, but the seller has tweaked it to make it more successful and unique.

You can make money with this easily. There is a small investment necessary, but the payoff is well worth it. This is something that cannot be saturated and seems to work indefinitely. If you want to make money, this is worth it. It is scalable, so essentially the more you invest the more money you can make. In terms of having BTC as a payout, that is not the case here. But in all seriousness, there is a currency exchange sub-forum on here that you can use to trade for BTC within a matter of minutes so it is not that big of a deal.

Thanks for letting me review!
