Thread: [Need some constructive critiques on my newest video](#)

**child\_of\_entropy** - August 17, 2017, 8:44 am

So recently I got a new pc and I can finally do more stuff than android gaming. I made a small tutorial on Photoshop and it's my first time editing in sony vegas 14 (well, at least for my video, i helped out my friend couple of times to make parodies). I still have to learn more stuff about Photoshop but at the moment, I make my thumbnails in PicSay Pro.

I make catchy titles (clickbaity sometimes but hey, I need to grow), I also make ok thumbnails, I don't edit the description too much since I don't need any social media atm since my channel is small so there is no point, I also put various tags for the vid

Here's a video -> <https://youtu.be/qOpLkjDQ-Fo>

You're also free to critique my channel as much as you want. But no hate haha

Well mate I'm gonna give the content a 10/10

"Well how the fuck are you gonna do that?"
