This game is pretty lit. It's diep.io and you pick from different builds and fight players.

GET ON THE TOP OF THE LEADER BOARDS! The more people that join, the more fun it'll be!
Best HF member wins :D

Party Link: diep.io/#A4FC7EB1BB3088AEE39040

If you join the game click and hold the letter "K" to get maxxed level (45)

If you click "O" it kills yourself and you can try a new build.

If you click and hold "Y" it shows you all the builds you can choose from.

Don't spawn kill. If you are new to the game I'll go easy. GL!

Note: I am not 100% sure where to post this. I remember there was a game for typing speed posted in the Lounge so I figured this is the right place. It's not a Forum game so I am not breaking Lounge rule #7...If in any way this thread violates the rules, I will close/move this thread to the proper place.

May the best HackForumer win! :)
