Thread: [Jailbreak Apps Without Jailbreak](#)

mdorame15 - August 17, 2017, 11:26 pm

Hello, Im new here and really like the people here so I figured I'd share this information. If you own an iPhone and haven't been able to Jailbreak, there is a way to get certain tweaked apps such as phantom for snapchat, spotify++, instagram++, and youtube++, etc.

In order to get these, all you would have to do is go to appvalley .vip (without spaces) and download the app from your mobile device and give the app permission by navigating to settings>general>profiles&devicemanagement and verifying the app from there. An alternative to AppValley is TweakboxApp which can be downloaded from tweakboxapp .com (without spaces). Once downloading appvalley/tweakbox, you can simply download any app on there without redirecting to the app store. once apps download, you would have to repeat the settings>general>profiles&devicemanagement steps and verify those apps as well.

If you need any help feel free to ask. Hope this was helpful to some of you guys.

You can get any app on and iOS device using Cydia Impactor. The difference between being jailbroken and not jailbroken is the fact that you'll most likely need a PC/Mac to install those apps (Using cydia impactor.), unless theres another method I don't know about.

The thing is that in order to use cydia impactor, you need a developer account, which many people don't have. You will need to repeat the same process weekly as well. Also unless theres a way around this that I don't know.

You can also download TutuApp. Has a bunch of jailbroken apps & you can do it without a computer.

CornOfTheJar - August 24, 2017, 7:03 pm

Anyway to get tweaks? I'm guessing not possible.

Cydia Impactor will be your best bet, I downloaded youtube++ and spotify++ using it and it works fine. Just google it not to hard to do.

So is there a way for me to get MiWi or any other hotspot tethering app onto my unjailbroken

iphone? I'd <3 anyone if they could pm me how if this is possible <3

Zher0 - *August 24, 2017, 7:10 pm*

Are there any tethering apps available with these jailbreak work arounds?

XPLADOT - *August 25, 2017, 9:11 am*

What about jailbreak tweaks? Is this possible without a JB?
