Three hours!

Lets see yours :D

Mr Meeseeks - August 18, 2017, 12:09 am

Very nice tattoo, I plan on getting one when I turn 18, something related to the Bioshock franchise or something from a Misfits album cover.

Cagey - August 18, 2017, 12:09 am

I'll update tomorrow when it's bright out, I got a shit ton of tats though

Captain Steve Rogers - August 18, 2017, 12:11 am

I don't have a tattoo.

Looks nice, is it permanent?

Moon Rock - August 18, 2017, 12:12 am

Looks pretty decent, I was expecting a stick and poke or something else.

Malaa - August 18, 2017, 12:19 am

Super cool tattoo bro I vibe with it. Personally don't have any myself and don't plan on getting them either anytime soon.

Cagey - August 18, 2017, 12:20 am

Just updated mine! Lmao and no I don't regret it.

It's way to expensive to get laser removed so I'm gonna cover it with something, just can't decide what yet. Every tat does have a story but this is one I'd like to forget ?

Not my first tattoo but the only one I have a photo of. Currently in the process of getting it finished with another session this weekend. This is about five or six hours of work. Bonus points if you can guess who it is - shouldn't be too hard:

Can't really be compared with the kind of pain you'd think of. It isn't that bad though.

evlkmflkfvr4 - August 18, 2017, 11:30 am

Damn that's nice. How much did it cost?

It differs greatly depending on where you are getting it. It hurts more in areas where there is less flesh like your wrists. Imagine getting a bad sunburn and somebody vigorously scraping it with a blunt knife.

It's obviously not intolerable though. Grandmas get tattoos.

xrhstosdrouggos - August 18, 2017, 1:13 pm

Amazing tatooy bro, im currentlty dont have money to make one, but when i get job i will tatoo all my hand

Dude that shark tat is totally amazing, the details are really good! I don't have any tattoos myself but I plan to get one in the next few months, just still deciding what I want to get.

Do you plan on getting more tattoos & how long did that one take?

Thanks man.

Sharks represent the pinnacle of evolution. They are perfect predators and the best at what they do. They have survived all five mass extinctions. I have always been intrigued by them and just like them, I too try to be the best at everything I do.

I was super into it before my main got banned and played every day from S1 -> S4/5. After then I got banned for trying out scripts and never took it seriously again. Mostly just got it because his head looks dope as a tattoo, so do most of the characters. Next one might be an Aurelion Sol one with a space/galaxy theme behind since since I think he would look dope too plus I love space and the universe and shit.

That's awesome as fuck. Already can imagine how the Aurelion Sol one could turn out like you describe it. Aren't you afraid you're going to regret tatting game characters on your arm later on in your life?

Also, how much are you paying for the Rengar one if you'd be willing to share that.

Also, how much are you paying for the Rengar one if you'd be willing to share that. I don't think I will regret it at all. I think they look dope and honestly, in terms of tattoos, that's what matters. I haven't got any on my arm yet but plan on getting full sleeves too. They most likely won't be game characters but even still, I don't think game characters are anything to be embarrassed by. The ones that I am getting are vague enough that anyone who doesn't play/know League won't even associate it with the game.

My entire back is estimated to be about \$2k -> \$2.5k - my artist works faster the longer you can sit still so yeah. Hopefully 1 more session (tomorrow) and it'll be done or extremely close to being done.

Yeah it's not too bad. I don't know what to cover it with. Still thinking.. I don't want any big/full tattoo sleeves yet. Laser removal is too expensive.

I'll make a decision one day. There's a million things I'd love to have there instead, but they are all hollow or don't cover it well enough.

Lol £800 lowest quote from 4 places.. fuck that.

I read online that if you get a tattoo kit, you can tattoo over it but with a clean needle, it will break the skin, pull the ink out and might actually work removing it.

A while back I really wanted it gone so I actually use a scalpel, hurt like a bitch but got some of it off.

Once you have a general idea I suggest speaking to your artist and they will be able to guide you through what exactly you want and hopefully draw up a few sketches. Don't just rush into something because it will look funny as a joke because you are stuck with it for life. Also keep in mind that most pieces can be covered up if you don't like them later in life.
