Why don't you just use LeakBase?

<https://leakbase.pw/>

It used to work for me a few Months ago, however I only use leakbase now so I can't judge about leakedsource. Is it the official domain though?

Why don't you use WeLeakInfo?

<https://weleakinfo.com/>

-snip-

weleakinfo seems to be the most viable option. But it is quite expensive.

or weleakinfo?

charsssss
