Thread: [how to forward/copy telegram messages in live time?](#)

Bulma - August 18, 2017, 5:07 am

hey,

not sure if this is right place to ask, but will try.

I need your help guys.
Who can tell the solution to this situation?
There is telegram group in which messages are coming each day.
How could i forward all messages to another telegram group or to any group.

For example: there is one telegram group.
I have 5 people who also interested but they cant join the group, but i can. so how could i share the info in real time and automatically?

Hope you understood the question.
