? ? ? ? ? ?

Not sure how no one has made this joke yet,

My favorite font is Comic Sans MS as it really gives you
a nice sleek and modern feel but not over the top. It's amazing 10/10!

Edit: Honest answer: I enjoy Uni Sans but other people seem to not like it.
My most hated font is Lobster. I see it everywhere I go whenever I go out and do shit.
It actually annoys the fuck out of me, I'm not sure how it is so popular.

Luck 2 - August 23, 2017, 5:37 am

Roboto is such a nice and clean font

Blue Shadow - August 23, 2017, 1:28 pm

I wouldn't say it's my favorite all time but one I really like right now is Rounded Elegance:

I'd never pay for a font despite the price. Too many fonts being provided that cost nothing.

Cyam - August 24, 2017, 3:21 pm

Don't use BEBAS on thread designs - it looks awful.

I use Raleway, Helvetica and Open Sans most of the times.

loxnen - August 26, 2017, 1:35 pm

My top fonts have to be raleway, Helvetica nue and Lora.
