Thread: [What is your favourite server?](#)

What's your favourite server you've played on or still play on?

I forget the name of it but it was a hunger games server. Loved making friends and talking via Skype and playing it. Also, HuddoCraft was another favourite, which was a prison server.

I have been having lots of fun on Skycade, on their skyblock server, It has inspired me to turn my simple SMP server into a Server network hoping to start out with Factions and an SMP at the start. The way they run it is great, no paid ranks, it is so far from p2w and I absolutely love that.

I enjoy p2w servers. If I like the server, I'll pay for the goods to have an advantage. I also enjoy free-to-play servers too, where you earn everything etc.

When I did play minecraft, mineagepvp was probably my favorite server.

Either mineagepvp or CEdge (in the old days).

I play competitive factions with paypal ftop prizes so those are my fav

All the servers I've enjoyed playing on are dead. Mostly drugcraft and prisons, I really enjoy the plot and rare item aspects of prison servers. Doubt I'll ever find a great MC server again, so I guess it's going to continue only playing MC once every few months on a hub server like Hive or Hypixel.

Wynncraft if you're into RPG. It's truly an amazing server with over 100 quests and over 1k items, unique leveling system and lots of players.

How many players does it usually have online? I like servers that are active in chat etc

I just took that screenshot to post on the thread. The map is massive too, but it's always a cool thing running into people in remote areas. People almost always stop and say hi if you find yourself in a grind area or somewhere that's not a highly populated area.

Used to be Woodycraft but he shut down the server :(

ohxerxe - September 3, 2017, 6:56 pm

wynncraft was so fun for the week I played it If I wasnt busy I would get back into it

foddermc - September 5, 2017, 8:32 am

McPvP even though they shutdown :(
