Thread: [BotKiller Techniques](#)

fookerfok - August 21, 2017, 1:16 am

Hey,

I was searching for some data regarding how Botkillers works.

Could anyone provide info & experience about this topic?

If you want a basic botkiller then:

<https://hackforums.net/showthread.php?tid=4657700&pid=44541283#pid44541283>

You could dump the strings from a specific malware and search in memory for those strings.

Also you could upload suspicious files to VirusTotal via their API. Idk what bot had this feature and I cba to search for it.
