This is an announcement regarding Spartan Crypter

I'm excited to announce the release on Spartan Crypter GOLD.

This version will have longer FUD times, no more crashes and Run & Scantime FUD results.

On April 3rd, I will release Spartan Crypter GOLD. When this happens I will stop supporting the old version of Spartan Crypter effective immediately.

If you bought a 1 month license in the past 7 days, you will get 7 days on Spartan Crypter GOLD.
If you bought a 3 months license or a lifetime license in the month of March this year, you will get the following x amount of days on the new crypter as compensation.

3 month licenses: 14 days on Spartan Crypter GOLD

Lifetime Licenses: 30 days on Spartan Crypter GOLD

If you are eligible for this, please PM me with the following information on HF and on HF ONLY, PERIOD!

- Your old name and key
- Your HWID from the Spartan Crypter GOLD builder (you can download this on the website)
- Proof of payment from your purchase

IF ARE MISSING ONE OF THE THINGS I ASK ABOVE CONSIDER YOUR LICENSE LOST! NO EXCEPTIONS!

I hope you all enjoy, have a nice day!

Madam - August 21, 2017, 6:14 pm

Great works.

I bought this crypter and my rat was not detected by Kaspersky, even in runtime.

Vouch for OP and Spartan Crypter.

The Doge of Wall Street - August 21, 2017, 6:30 pm

heard a lot good shit about this crypter and also OP

i would use this crypter if i ratted and its also coded in C++ wich is a big + glws OP !

MrPongi - August 21, 2017, 7:00 pm

You are sent pm to skype waiting for you to accept, I have a doubt this crypter by pass avast and the other is going well with the rat Quasar

(Aug 21, 2017 11:04 PM)Marcel26 Wrote: [\[CITE\]](#) Vitani i don't have seen you on Skype last 6 days why ?

Since I launched this crypter last year there has not been a time where I have been offline for more then 1 day so that is incorrect.

If you don't contact me yourself, I can't magically know you need my assistance and contact you.
You've got to come to me. That's the deal.

breaker1911 - August 22, 2017, 1:55 am

Amazing crypter with unlimited binder, new version is just better

Multi/unlimited binder, amazing compatible , i'm using this to protect my software and its work like a charm

JustMe1337 - August 22, 2017, 2:26 am

Wangxia - August 28, 2017, 8:50 pm

A complaint! First no doubt the crypter works fine when push an update.

But the problem is this, you only work with USA time in your update which is quite unfair for us in asia (you don't have only USA customers).

You only push update in the morning (USA time) which is evening (I mean bed time) here in asia. And right now being morning here the crypter can't bypass 3 major/popular AV (ESET, AVAST, AVG)

Vitani, please look into this matter, so disappointing. Atleast pushing a new FUD stub morning and evening.Thanks

I'm not sure where you got the idea that I push on USA times but I push around 8am and 8pm GMT usually.

Aside from that I am pretty sure most if not all of your detections could have been avoided with some common sense.

That's because IM is not native and does not have recolations. Therefore alt. loader won't work.

Just pushed a new FUD stub, enjoy.

Wait till I wake up and then wait a little longer until I'm on my PC, from there on out you should have your license pretty soon as the first thing I do is check HF and after that log onto the support skype.

ANDYANDREYRU - September 7, 2017, 12:49 am

He usually does not come often, I only received the cryptor the next day, after several tests I checked and found out that the FUD file, but after a while there were 4 detections on ESET NOD32 Antivirus, F-PROT Antivirus for Windows, Avira Antivirus Suite and FortiClient Lite, I did not even fill the file anywhere, just initially cried it and it just lay there, that's how such detections became after hours 8, probably somebody from the uploaders filled in or spread it in the wrong way. But in general I liked Kryptor, he bypasses heuristic analysis.

As the thread states, it only works on .net and native files so no, it won't work on files for MacOS.

Great seller, offers support, helps out when he can. He has my vouch as real customer.

To be honest, it bypassed Nod32 on runtime with the new stub, but Avast already started detecting it and AVG. Anyways I think Vitani will push a new stub soon and hopefully this time more longer FUD.

Great seller, I support him, you should buy this. Even if it gets detected, he makes a fast update eventually.

Waiting for Avast and AVG fud, new stub.

Shadowstep142 - September 19, 2017, 2:02 pm

Honestly, This product is really good. It looks modern. Its super easy to use and easy to get a FUD.

My experience so far:

3 reFUD stubs released in the past 12Hours.

Vitani provides good support and replies within an hour(unless sleeping)

I tested it on both Imminent Monitor as well as Quasar. Both working perfectly with every feature working as well.

I will be testing this on XMR Silent Miner as well.

My overall rating : 9/10

Releated this, it was just the Nod 32 not running back then and I though it bypassed it, when it was turned ON for the test, it automaticly deleted it. He seemed to be helpfull at the start, but on runtime most of the AV's detect it, even Windows Defender.

Even if it's FUD, the function "Persistance" and "Install" are being detected aside.

I told some friendly words as he kept asking me on PM even from the start I bought it and I though ... alright, that way he'll show some support and help me out, but I'm not a noob. I followed his suggestions with clean server and clean functions, but nothing, runtime gets detected.

I asked him multiplie times for friendly refund over PM he started threatening me as you will see in the image a bit down. Then he started offering me 50% and for one moment I agreed, then he told he'll pay me later soo he just kept delaying, soo I decided to put things in my hand and ask PayPal

for real assistance on this, we'll see how it goes. The crypter was tested under Cybergate and Babylon from me, not working at all on runtime.

I do believe that his advertisements are mis-leaded and he should offer friendly refund. I asked for the refund few hours after I bought and it's understandable. As buyer protection in law's, a customer has the right to return the product in 15 days if his not satisfied. I tried to be friendly and friendly but that was the end, really.

This is my honest review, It's not a sale trash, it's backed with proofs.

@Vitani if you want to protect your reputation, offer me the friendly refund and I will drop the report on you, since it's not just a dispute. I have business account over PayPal with a lot of connections and I'm reporting you for this directly. I'm not just a random guy/kid.

My sales manager will deal with this case from now along. Show that your understandable now and give me the full refund, since I had not used your crypter at all, only tests which failed.

Spoiler ([Click to View](#))

I'm not sure why you felt the need to post this as I thought we had reached an understanding, but appearantly you couldn't handle not getting your way.

First of all, I don't really get where you are coming from. You randomly post in my thread saying you like my product a lot, but it did not bypass AVG and Avast (they did if you used the latest stub but that aside) and then when threaten me in PM that you're going to post a bad review if you don't get a refund. After all that somehow you still make me out to be the bad guy?

I have offered you my help multiple times. If you just want a refund without even showing me your problem and giving me a chance to help you fix it then you shouldn't be surprised if you don't get a (full) refund.

As for you saying I delayed the refund I said I would give, I told you I would do it later today and 10 minutes later you post this? You can kiss that refund goodbye. Feel free to get PayPal on it but I'm done dealing with you.

Unbelievable.

It should be FUD but I'll check it out again. If it has detections I have another stub ready to push :)

It currently has 1 detection. If you got more it's most likely due to your icon or some other setting. Contact me in PM to get help.

Why cant you just send the activation here or to my email that i used for the payment ?, Wow! i very angry about this service i hope its not a scam.

Its funny how a payment is always required to be sent first and when you do, You still need to beg like a bi**ch for what you've paid for.

THIS is NOT Fair.

I'm sorry but no message from you yet...My request/message to you on skype is still pending mate. Looking forward to your reply...Thanks!

komandirbk - October 15, 2017, 6:22 am

Well, after few days testing i can say that, stub updates are really good and fast. It works well. Maybe ~10 hours and file have 1-2 detects and you need to do a new one.
I recommend this seller!

blazesays2471 - October 15, 2017, 2:01 pm

All the positive reviews inspired my first subscription...why am I the odd out? Still haven't gotten what I paid for....Please reply my message on skype Vitani...

I was planning on giving this a try, but it turns out that your Skype support take forever to respond to messages. Ho then can I be sure to get support when I make a purchase ?

PS: Is there anyone who can confirm that this crypter works with Netwire RAT ? cos that's what I need to get crypted.

Vitani - October 15, 2017, 4:14 pm

Hey all. Unfortunately I've been ill all day and not been able to attend to skype. I will catch up with everything shortly. Thanks in advance for your patience.

sonlason007 - October 23, 2017, 11:17 am

This is the best crypter on HF... very honest and humble support... I vouch 10/10...

angel2050 - October 23, 2017, 11:35 am

First of all I vouch for Vitani not only for his good crypter but the kind of support he provides.

In the past month I have been a frequent buyer of some products to test their efficiency and Spartan is one good crypter. I have a lifetime license of it now.

It can happen sometimes that some product might fall a little short of expectations. After all its technology. But what matters the most is client support. In this case I am not only satisfied with Spartan crypter but I give my salutes to Vitani for being the only one around with such a brilliant response time.

You care for your clients. I am sure your concern for your clients and interest in their personal product experience will sharpen your skills and products to unmatched quality very soon.

Thanks a lot.

My Regards.

There is no promo code.

Just like any website ever that gives you the option for a promo even if it doesn't exist and the crypter is cheap as it is.

If OP decreases prices means he well need to decreases his quality. ???

Sigh. You first ask me this question on skype, after which I explain in detail how it works. Then you proceed to ask me the same question 3 different times on the website and then after I answer there you ask me the same question 2 more times on this thread? Bought a license, and spartan crypter is the shit!

0/42 on viruscheckmate, and 0/36 on nodistribute. If you havent already bought a license, then do it today!

I first needed help when buying, and Vitani responded in 12 minutes.

Thanks for the great crypter,

Jack

Just replied to your messages. You're welcome to buy a license however the Spartan Crypter source code is not for sale. If interested I could sell you another source though.

If you are open mind for suggestion then I suggest you this feature:

Adding an option in the crypter to update it self every 24 hours (We add the time in option) from certain link and remove the old bot and change it with the new one.

By adding this feature we will be sure the bot will always updated with a 100% FUD bot.

Im having some trouble with nanocore and a detection, but op is very friendly on skype.

Just bought this. Actually the run4me scan shows avast bypassed but I manually tested and found avast detects it after few minutes and blocks it quarantines it, abc.. bypasses the deepscreen

though. Crypter is still good tho.

Most likely due to a setting or feature of the thing you're crypting. Contact me in private and I'll help you resolve it.

I push a new FUD stub every 12 hours so most likely some setting/feature you are using is causing the detections. Contact me in private to resolve it.

It's obvious you're not using the latest builder/stub, which is not on me or the product. If you don't bother to read first before you start complaining there's not much I can do.

I won't hold your hand and spoon feed you everything just because you bought my product. I can't teach people not to be stupid.

Side note, if what you said really is true and the crypter hasn't been FUD for over a month, don't you think there would've been more users complaining?

Sorry but I can say I am displeased. I had this program working once so I decided to go to discord for support as support is advertised and was told I was in violations of agreement. (fine I only used it on my lan anyways . . .) But I guess my ip is to be closely watched and will be banned the moment I step over their boundaries. Really? It's been broken for me anyways and have not received any support, only threats, so I fail to see how I would even accomplish this anyways. No matter hope you enjoy my 40 bucks Merry Christmas I guess.

I am not sure who told you you were in violation of the TOS or why, but unless you were mass spreading or scanning on VT you should be fine.

As for Spartan watching your IP, I can assure you you're fine. Aside from me no one has access to any records or client information and even I don't monitor anything like you think I do. Feel free to use wireshark to verify it for yourself :)

As for spartan being broken and you not receiving any support, I'm here everyday and if the discord guards can't help you feel free to message me directly on HF PM (not thread), Discord or Skype. Also be sure to use the 4.5 builder if you're problem is update related.

Merry Christmas to you as well, hope we can get your issues fixed :)

Thank you Vitani for your timely response and your assurance. The violations that were in question was because I mentioned 'bot' and someone chimed in that said spreading was definitely not allowed (I can assure you I did not spread at all as I have only tested on my LAN) I am running 4.5 builder annnd this is the sales thread (caught half way through my post) If you wish you can pm me and I will give you further details or you can direct me to a support thread (unfortunately I have lost faith in discord) Thank you kindly again for your response.

P.S. Unfortunately my noob account will not let me PM you :)

Of course. I always aim to help my customers the best way I can. Just because you call them bots does not mean you're doing something illegal as terms like bots/minions etc are used in a company work environment just like they can be used here. I'll PM you to fully resolve this issue and also the other issue you're facing. I'm confident we can resolve it easily :)

How is this relevant? I clearly state in the OP of this salethread which OS versions are supported. If you were looking for something other then what it does then you should not buy it.

It's like saying you don't recommend eating beef because it doesn't taste like chicken.

Correction, I ask a \$5,- fee if you want to move your license to another PC or if you are the reason your HWID changed. (Which is also clearly stated in the OP?!)

I have mine on a server it works just fine to crypt the output will only work on user based systems. You don't need to exchange to use it.

I can't comment on that at this time. I can tell you that it's a competitor who's a bit sad that my crypter is far better then his, and said person is trying to compensate for his lack in skill this way. Working on server hardening at the moment. It should all be dealt with shortly.

Umm was I supposed to PM to get a license activated after buying?

The easiest and fastest way to get activated is through the website. Simply log into the client area, submit an activation request in the activations tab and when I activate it you'll be able to find your name and key in the client area.

I just went through all request so if yours was in there you have your name and key now. If not feel free to submit one or just PM me here :)

Just pushed a new stub! Hope you all enjoy.

What happend when you don't pay for next month? Do all connection get lost or you are just not able to use next month crypter?

Great Crypter. Bought it, used it and all i can say FUD

345twind - December 24, 2017, 5:25 am

bro when i pay with perfect money
it told me to change pm to eth
so do i have to pay \$30 pm or \$30 eth ?
\$30 pm = 0.0433 eth
\$30 = 0.04540638716512789 eth
i have only \$31 in my perfect money acc

If you do not pay for next month the crypted files will still work of course, you'll just lose access to the crypter. This means you won't be able to crypt more files until you purchase again.

You have to pay 30\$ in ETH yes, though it should not be a huge difference.

That's a generic detection, usually caused by detected file settings.

File meta tags, you know how to change them?

Play a bit with file version etc, re-scan and should be fine.

Also, this is a sales thread so If this doesn't help, just stick with PMs and Vitani will help you ?

As far as I can see you get symmi detections along with a UPX one. The UPX detection by clam is due to compressing.

The Symmi one is a generic detection. Changing icon/assembly will most likely get rid of those.

As for me not replying on Skype, you'll have to excuse me if I'm a bit slow today, this because I'm celebrating New Year's eve.

Most likely because you're running your file on windows server. Only windows xp-10 are supported at this time.

I'm unsure why windows defender flags your file. I'll have to update the stub which I'll do later today, so that may be it.

I am aware of the PayPal issue. I am working with them to get it fixed. I hope to get it back up as soon as possible but it could be a few days.

If you can't wait please check if you can use an alternative payment method.

That's not Vitani's fault. Pay with a cryptocurrency that confirms transactions faster. Or with PayPal if you want really fast.

Well for sure i'm enjoying it ?

The only thing I think that's missing is something somewhere, explaining how some features works like the persistence.

Not just the average explanation on the website but more of an in dept of how it works would be nice.

Through testing I got a lots of answers so it's not that bad ?

Scantime with the new & the old stub got me 0/37 detection ! that's impressive.

Also HUGE THANKS for trusting customers like me ? I paid using paypal eCheck (7 to 10 days before the money is sent to the seller) and the day after you activated my crypter license ? I didn't even need to ask if you could trust me ?

Tell me about it..

This particular user kept spamming me in caps that his file wasn't working, so finally I gave in yet again and joined him through anydesk and after 20 minutes it turns out his file worked just fine.

I don't mind helping people at all and I also don't mind taking the time to help them but this guy is just blatantly wasting my time.

Help.
Currently Windows 10 1709 version is in use.
It is detected as Trojan: Win32 / Fuerboos.C!cl in Defender.
And I scanned from spartan crypter, but it comes out as 13/37.

I only need to pass Windows Defender. Is there a solution?

Again, this is not on the crypters end, this is most likely due to you not adding a (FUD) icon.

Thanks I sent in a help ticket but I'm wondering the scanner function is not showing any results just that it's scanning and then that it's finished. I thought it would show me what the results were for each antivirus was I misinformed? Or I'm I doing something wrong? I'm new at this and would really appreciate your help.

Thanks!

It does supoprt quasar and yes it's FUD at the moment.

A crypter doesn't encrypt the actual network connections no.

Persistance is as good as ever :)

Here's the fix for that.

Use regedit:

HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Policies\System

Change EnableLUA from 1 to 0

I can vouch for this product! I used his product some months ago and i was very satisfied with it. Nice to see a v2 here. Awaiting reponse from Vitani regarding few questions :P

XMR007 - February 26, 2018, 1:22 pm

Re-renewed the license for 3 months. Excellent acquisition, I do not regret a cent. Their job Cryptor cope perfectly well, the stub is updated at least 1 time a day, sometimes 2. Detect AV happen, but basically it is a noname AV. As soon as Avira, NOD, Kaspersky, Avast promptly issue a new stab. Before buying Spartan cryptor I managed to use and Kazy (forgive me the developer because I have a license for 6 months), Flow v3 (Issued broken files of 30 MB), Cloud protector - you know what I'll tell you? they were not around! Separately, I want to note the excellent support of Spartan users! The Cryptor is regularly updated and fine-tuned to the face. Definitely recommend to purchase... Tested on .NET 2.0-4.5, C and C++ small animals.

Top notch Product... Top notch Vendor. Am not sure about the users though as it appears they scan on website that distribute results (yes! even Nodistribute.com, distributes results so quit and stick to the scanner built in the crypting app) Is it just me or is anyone else still having serious problems bypassing gmail security when it comes to executables? Tried virtually all compression techniques or extention. Only passworded files seems to make it past. whew!

My apologies for the issues going on with spartan crypter and the spartanproducts website for the past 2 days. I am looking into the issue and working with hosting support and web developer to get this fixed as soon as possible.

hi mate, I know you are quite busy at the moment. just a quick question: when do you think spartan crypter is going to work again?

the crypter can't download the updated stub ("download mismatch")
your website is down too, so I can't download a stub from there.

the latest stub I have is from 2 days before, and it is certainly not fud any more :(

i really like spartan crypter... best crypter I had until now. hope it will work again soon.

HQ Crypter, nice job Vitani, like your crypter very much.

Vitani i live you the message on your website, on support thread because here i don't have 25 posts

Anyway, best crypter you have and to the people who say your crypter is no good anymore is a lie, buy people and you can see is the best and have very low price. Best crypter ever :*

I am trying to find a way to get PayPal back but the company is giving me a hard time. I might have to switch to google wallet instead.

It should be FUD right now and I push a new stub every 12 hours so you should (nearly) always have a good UD status.

Big Vouch for this guy and his Crypter.

I recently bought it aswell and I thought it Isn't FUD.

I just used the wrong icon and the Wrong Version Info. Now It's FUD since the Update and It is working fine.

His Support is awesome. Vitani is helping out most of the time withing 2 Hours.

First of all stop using all caps for your messages. It's extremely annoying. Secondly, it is FUD if you change your icon and/or version info.

Great that you want to buy Spartan Crypter!

Please head over to: <https://spartanproducts.net/panel/login> , log in (or register if you do not yet have an account on the website) and purchase your desired package in the client area.

After payment head over to <https://spartanproducts.net/panel/activate> and follow the instructions on that page to submit an activation request.

You can download the builder from the downloads page on the website. After running that on your PC you'll see your HWID. Then use that to make an activation request. After that I can activate you.

Do PM me if you have further questions.

This is an announcement regarding Spartan Crypter

I'm excited to announce the release on Spartan Crypter GOLD.
This version will have longer FUD times, no more crashes and Run & Scantime FUD results.

On April 3rd, I will release Spartan Crypter GOLD. When this happens I will stop supporting the old

version of Spartan Crypter effective immediately.

If you bought a 1 month license in the past 7 days, you will get 7 days on Spartan Crypter GOLD.
If you bought a 3 months license or a lifetime license in the month of March this year, you will get the following x amount of days on the new crypter as compensation.

3 month licenses: 14 days on Spartan Crypter GOLD

Lifetime Licenses: 30 days on Spartan Crypter GOLD

If you are eligible for this, please PM me with the following information on HF and on HF ONLY, PERIOD!

- Your old name and key
- Your HWID from the Spartan Crypter GOLD builder (you can download this on the website)
- Proof of payment from your purchase

IF ARE MISSING ONE OF THE THINGS I ASK ABOVE CONSIDER YOUR LICENSE LOST! NO EXCEPTIONS!

I hope you all enjoy, have a nice day!
