I'd do it if I didn't have to be your referral. Kind of a cuck that I have to pay you to use it and then pay you even more via referral..

Money are money.. The price for this is so low (I'm selling 14 days subscription for my EarnHoney bot for 30\$), so why not want customers as referrals?

You dont pay to be a referral... its kind of a "cuck" move to not be his referral since it does jack shit to u, and it helps him. hes giving the software out for a pretty cheap price anyways

I can't tell you how much captchas it will solve per month, but I can tell you, that I'm now making a new version and with this version, it will need about 50% of current count of captchas

It sounds like the bot just needs a better captcha service some of them can instantly solve them and some takes 10 tries per captcha.

How much have you had to invest after purchasing the bot and how long have you run it for before breaking even? Im interested in margins of profitability. Investment vs Profit.

I am interested in the bot but I am also interested in knowing what type of profit margins I can expect.

and to run all this are you using a windows vps you must pay for as well or simply off your own computer from time to time?

edit: I saw your first post was on the 22nd so I assume just about two weeks and you've made 7\$

colchester - August 30, 2017, 10:10 pm

that was \$7 in a week so his math isn't wrong but you are paying \$5 in 2captcha fees every week at current rate.

hmm, so we could be looking at 5\$/m for the bot, 22\$~/m for 2captcha and possibly at the lowest I've seen 4.95\$/m for a windows vps.

32\$ invest and a return of 7\$/week 4.5 weeks in a month assumed 32\$/m

Profit margin seems VERY Slim. Thank you for the information, i will await when the owner improved his bots captcha system as he has said he will do.

If you buy AntiCaptcha.com, then you will earn about 0.5\$/day, if you do surveys on eBonus.gg, then you will earn much more (for every survey you do, you should get another 0.5\$ from my bot)

Theocritus - October 9, 2017, 8:26 am

after having tried out this program i have a few thoughts about it.

setting this up is not really hard nor time consuming, though to me it was not the easiest as it wasn't explained perfectly in my opinion.

though the main reason i don't see the most usefulness in this is that your videos are it seems limited unless you put in a few hours unlocking a higher limit. if you do do this, then yes i suppose you will be able to earn a dollar or so a day, but if i have to put in multiple hours to get the max possible a day, and the max being decently low, there just isn't enough value in it for me to continue pursuing it personally. To me it would seem that if you do actually manage to make around \$50 a month, if you can have a pc running it everyday, then sure you will get something out of it. but then again this might not work forever, as it can be patched, blocked etc.

to me this is a cheap software, with low potential income, but if you want to put in some effort and time to maximize it, then sure you will have a bit of profit ?

Thank you for the review. I have to update few informations.. This can't be blocked or patched, because I talked with eBonus.gg support, they checked my account and accounts of my customers many times and they said, that it's fully clear.. You can earn on one account from 0.5\$ up to 2\$ and it depends on if you do manual offers or no. So if you can run it on for example ten VPS at once, then you will get $0.5 \times 30 \times 10 = 150\$$ per month by just doing nothing.. Anyway, I'm planning to add DeathByCaptcha (having troubles with their API, so I'm chatting with support), so you will save more money on captchas. Then I'm planning to add more features to the bot, for example watching streams (I don't know how much points or money it will earn per day, but I think that each more point is good :-). I'm planning to add function for clicking on that random bubbles for earning much more points.
