Thread: [Any Ebooks that actually lead you to Earn?](#)

I'm interested in becoming more of an Entrepreneur, I want to become a big earner. I'll read whatever "Ebooks" I need to, even pay for them if they're legit and have real proof to back earnings from them.

I see people on here posting about how they make thousands in a week, how? There must be some legitimate way so hey why not.

I'd also be interested in chatting with some proven Earners for mentorship with this. Just drop anything that would be helpful, or any knowledge someone may have on this will help.

Let me know ?
