Ok, done quick review - your book seems to be quite quick guide - nothing like in-depth but it covers most of the important doxing parts with links. Can't say it doesn't.

But I think that you should perhaps give the user some example when you say that they have to write all info down like using dox template which are still searchable on internet and maybe also add one part with metadata from their pictures. It's just an idea though.

Anyway, I think you did quite good job with it you definitely took some time to write it down. I think that it's worth it. Vouch for this guy!?
