Thread: [MyBB Development | Themes, Plugins & Additional Tweaks | Exp. Since 2012](#)

Wires - August 23, 2017, 10:42 am

With over 5 years of experience (since 2012) as well as being an Official MyBB Contributor, I've acquired a wide range of knowledge and various skills around the MyBB software which has also allowed me to own many forums. Along-side owning forums, I have also ran a MyBB Development School and [Dawn's Forum Development Course](#) which primarily consisted of Theme and Plugin Development, as well as diagnosing common problems and security tweaks. The skills that I will be offering today is as follows:

Theme Development

Plugin Development (Depending on the request)

Any additional tasks

Bits & Pieces ([Click to View](#))

(MyBB 1.8 Version)

(MyBB 1.8 Version with iHydra's Permission)

Forum I currently own - [deleted]

Recent Plugins Coded: Random Userbar Game (<https://hackforums.net/showthread.php?tid=5678822>), Tag User Game, Daily Message, Guest Welcome, Promote User, Invitation Codes, Welcome PM, Marketplace ID Verification, Trader Reputation System

In order to start the process, feel free to get in contact with me via post or PM. I usually answer all requests within minutes, but under exceptional circumstances my replies can take up to 12-24 hours.

I work by the project (meaning I give a total price, not an hourly price), and from most members I require payment (Only BTC) upfront unless the amount is exceptional and this is not negotiable or refundable. After completion, I offer revisions for up to 24 hours in most cases. In some instances I may refer you or seek additional help from various partners of mine.

Well that's what I was inferring when I said "(MyBB 1.8 Version)". Will add in iHydra's name.

Wires - September 11, 2017, 8:56 pm

Just finished up on a plugin based off of this idea:

<https://hackforums.net/showthread.php?tid=5678822>

Every 24 hours, a random user is selected based on the frequency of the posting in the last 24 hours. The user then has special privileges (i.e additional rep, access to all features regardless of group etc.).

The selected user is also able to "Opt Out" via custom page

Users are able to view history of winners

Now available for any requests.

Wires - September 12, 2017, 8:57 pm

Just coded another forum game for MyBB called "Tag The Next User". The plugin is used with NewPoints.

At a time interval of your choice, a random user (User A) is selected based on posting frequency in the last 24 hours. The user receives a notification stating they've been tagged.

User A proceeds to tag User B

User B receives a notification. User B must now guess who has tagged them and proceed to tag another user. If User B guesses right they're rewarded with credits from NewPoints and so forth.

May release this one for free.

Ombra - October 16, 2017, 3:10 pm

Hi Wires :)

I have few questions regarding this service

Are there set prices for MyBB themes?

What kinds of customizations are you usual to include by default, if you're usual at all? (e.g. sidebar with last activity, custom modal login, forum icons etc..).

Do you include watermarks? If so, how much do you take to remove them?

You can reply via post or PM me, I'm just curious as I will probably need one in the future.
