Valeant - August 24, 2017, 1:37 pm

This looks awesome, so no file needs to be executed on the machine for this to start mining?

asvps - August 24, 2017, 1:38 pm

(Aug 24, 2017 01:37 PM)Valeant Wrote: [\[CITE\]](#) This looks awesome, so no file needs to be executed on the machine for this to start mining?

Nope, just connect to the website and it will begin mining ?

GamingFTWHD - August 24, 2017, 2:00 pm

I guess they will need to continue be on the website for it to continue mining right?

^^^ thats what im thinking which means you wont any \$ if you have a big bounce rate.

The Doge of Wall Street - August 24, 2017, 2:11 pm

Good job thinking outside of the box :)

i wish you good luck with sales the website also seems verry nice i'm just going to rep you cus i think this is an awesome project !

asvps - August 24, 2017, 2:30 pm

(Aug 24, 2017 02:00 PM)GamingFTWHD Wrote: [\[CITE\]](#) I guess they will need to continue be on the website for it to continue mining right?

You can switch tabs and it will continue to mine or you can implement this into a large site and as users click on it will mine. There are many options and if you open your mind enough you can profit a lot.

thanks for the kind words ?

Truculent ? - August 24, 2017, 3:18 pm

How efficient is it comparing to .exe silent miners?

Subscribed. I'll keep an eye on this product. It's really interesting.

??????? - August 24, 2017, 4:02 pm

Vouch for asvps. Good luck selling this product, looks very promising!

Am very much interested in knowing this also, Thanks.

Faith Connors - August 25, 2017, 9:01 am

also kinda interested, wanna know on average how it compares to .exes

asvps - August 26, 2017, 10:53 am

(Aug 25, 2017 09:01 AM)Faith Connors Wrote: [\[CITE\]](#) also kinda interested, wanna know on average how it compares to .exes

I'm getting around 30% of the speed that I would get if I used xmr-stak-cpu.

I appreciate the vouch :)

THERE ARE A LOT OF UNCONFIRMED TRANSACTIONS PLEASE UP THE FEE WHEN YOU PAY OR ELSE YOUR TRANSACTIONS WILL TAKE FOREVER TO CONFIRM!

qow. - August 26, 2017, 12:16 pm

Vouch for asvps. Always makes good products!

stacks - August 26, 2017, 3:37 pm

This sounds awesome, but you left out a lot of important details, and the video doesn't really tell me much.

What exactly are we getting for \$70? Are we getting the source that we can upload to our own server?

If so, does it run on both linux AND windows servers? What are its dependencies? Or, are you hosting everything, and all we get is a link?

If it's just a link, then I don't see how this is any better than using a silent exe. It actually seems worse, since its technically less silent because the browser window has to be open, and its 30% of the mining speed of xmr-stak-cpu.

However, if we're able to host this ourselves, and inject the script via JS into any servers that we have a shell or root access on, then that would be amazing. If this is the case, than I'm 100% interested.

EDIT: I just read that the latest version of Chrome (and possibly FF too) throttles the CPU of background tabs to 1%, so if the user is not open on the tab, you'll barely get anything. Is that the case here as well?

?Mystical - August 27, 2017, 2:38 pm

Vouch for this, will deff be a game changer in the mining field

asvps - August 28, 2017, 11:22 am

You get source and upload it to your own hosting.

(Aug 26, 2017 03:37 PM)stacknuts Wrote: [\[CITE\]](#) If so, does it run on both linux AND windows servers? What are its dependencies? Or, are you hosting everything, and all we get is a link?
It runs on both Windows and Linux servers. The dependencies are node (and ws, but that's downloaded with the code) and read the thread it says you provide hosting.

(Aug 26, 2017 03:37 PM)stacknuts Wrote: [\[CITE\]](#) However, if we're able to host this ourselves, and inject the script via JS into any servers that we have a shell or root access on, then that would be amazing. If this is the case, than I'm 100% interested.
You can put it on any website you have a shell on.

(Aug 26, 2017 03:37 PM)stacknuts Wrote: [\[CITE\]](#) EDIT: I just read that the latest version of Chrome (and possibly FF too) throttles the CPU of background tabs to 1%, so if the user is not open on the tab, you'll barely get anything. Is that the case here as well?
They've done this for a while but it doesn't seem to affect web assembly.

Thanks for purchasing!

darkoja - August 28, 2017, 1:51 pm

browser must be opened all the time to work right?

stacks - August 28, 2017, 8:06 pm

@asvps

Thank you for answering my questions.

Edit: Purchased and received DL link. Thank you!

Will test it out and post feedback soon.

asvps - August 29, 2017, 1:40 pm

(Aug 28, 2017 01:51 PM)darkoja Wrote: [\[CITE\]](#) browser must be opened all the time to work right? As long as the tab is open it will mine they can switch tabs as well and it will mine but as soon as they close it, it will no longer mine.

jamesonboris - August 29, 2017, 5:17 pm

hi bro, why your not updating your exploit builder anymore bro for very long time, is dead now and you have new product now may be after some time will still be the same way your exploit builder dead bro

MonetizeMaster - August 29, 2017, 5:21 pm

wow really looks good but a bit expensive for me

SIM-3092442 - August 29, 2017, 7:21 pm

nvm

I am very interested will probably buy when I get a bit more money

riekal - August 29, 2017, 7:38 pm

Looks like it works as expected, but mining this way seems really inefficient, no?

If an average browser can only mine about 30H/s then you'd need hundreds of thousands of users connected at any given time for it to really impact your wallet, right? Help me out if I'm not understanding something. I see this as an investment, but I also see it somewhat difficult to get a positive ROI.

.Bux - August 29, 2017, 7:48 pm

With this and a little bit of imagination

By the way could it work inside a chrome extension

Since the main problem is how long the user will stay

Making the user install some chrome addon would be better long term mining

Just bind it to legit extensions and poof

Transcendent - August 29, 2017, 7:51 pm

I feel like you would need a lot of shelled websites for this to profit. Or 1 large shelled website could also profit you but who knows.

.Bux - August 29, 2017, 7:54 pm

Or some streaming website

Or manga scan

Doesn't matter, as long as the user stays on it

With a little bit of imagination and work you can make this web miner work for you and gain money!
