Thread: [How to check if a phone number is using authy \[Tutorial\]](#)

Larry - August 26, 2017, 11:28 am

It's pretty simple.

<https://api.authy.com/json/users/countrycode-phonenummer/status>

you get information about the userid of the phone number and how many devices connected to his authy.

free node.js script :P

Code const request = require("request");

```
request.get("https://api.authy.com/json/users/countrycode-phone/status", function(err,res,body) {  
  console.log(body);  
})
```

Thanks just checked to see if it'd work with my number and it did :p

oRequiem - August 26, 2017, 12:50 pm

That's pretty cool, didn't realize you could do this lol.

Thanks for sharing this with us.

?Criminal - August 27, 2017, 6:55 pm

Very useful for targeted attacks I could already see applications for this.

BlazinBlunts - August 27, 2017, 6:56 pm

Nice little tut, can be useful in a few situations I have in mind. Thanks.

Thanks for sharing this with us.

Hollywod1234 - August 28, 2017, 2:15 pm

The link didnt work for me

justaskliba - August 28, 2017, 2:31 pm

Thanks for the script! Would be great to make it into a simple visual studio program huh?
