Okay, so this is actually a rather new method that I'm just going to give out and write, at the same time.

Users who have received their \$5:

[SIGN UP HERE & START SENDING TO GET FREE \\$5 !!](#)

There is an app called Cash, it's sort of like Venmo where you link a credit/debit card and can send/receive money to/from friends and pay for stuff online.

Now, the catch to this is, that you can invite people using a referral code and if they:

1. Sign up & Link a card
2. Make any type of payment (sending/receiving) you will (BOTH) automatically be given \$5 for FREE!

NOTE: I am 100% willing to be your "FRIEND" in this scenario. Meaning, when you sign up off of my referral link, you send me \$5, which activates the promo, I send you the original \$5 you sent me, PLUS Cash.me will send you \$5 immediately after you send the \$5.

I can do the service for you to make a quick 5, and you can do it unlimited times as long as you have multiple phone numbers or emails, and can provide a card (Can be a visa prepaid reloadable, even if it has \$0 on it, you can link it then transfer the \$5 you made from the first transaction, and spend that \$5 on the new reloaded visa prepaid to repeat the method more)

METHOD:

Step 1: SIGN UP WITH MY REFERRAL CODE

Step 2: SEND ME OR A FRIEND \$5

Step 3: YOUR FRIEND OR MYSELF SENDS YOU THE \$5 BACK

Step 4: ENJOY A FREE \$5 (You and your partner get a \$5 each)

He/She starts with \$5, sends it to you. So you now have \$5, you send that \$5 BACK to your friend, and both of you get \$5 in the end.

So he/she starts with \$5, ends with \$10, you start with 0, end with \$5.

Can be repeated

METHOD (Social Media):

Same method as friends, but send it all over the world wide web

So, here's how i found this out:

My friend "Mike" and I were trying to figure out how to pay for the gas situation for a trip we're taking, we started sending out to ALL of our friends our referral code and before we knew it we were getting \$5 almost every hour.

PICTURE PROOF: Spoiler ([Click to View](#))

So I ask that you guys help me out, and help yourselves out by using this here code:

<https://t.co/HxZrY2sEyM>

The reason I have yall use my code, is that you're going to be new to Cash and need a referral link to get your own \$5.

what can you buy using this cash app?

This is basically an app that you can send/receive funds to/from people, and can transfer funds from your "Easy Card" which is provided by Cash.me

The Easy card is basically a debit card that holds the funds you have on your Cash.me account, and you can also choose to receive a cash card in the mail and can actively use it as a debit card.

Yes indeed it is.

As stated, you either need a friend or you can use my invitational code & me as your receiver (which would help me make 5 bucks too)

Need a valid cc/dc linked to account
