Thread: [Free Background Money Maker and Youtube Views *TRAFFIC CLICK BOT*](#)

habemueller - August 26, 2017, 7:06 pm

Hy Guys i'm new here and want to give out a free gift.

I hope i'm welcome and you can enjoy.

This is a free background money maker and coded in vb.

Earn money on bc.vc or made youtube views and many more...

This is a Proxy Traffic Click Bot made by me.

And sry that i can't post any pictures or a better link..

Can please someone solve this for me i'm not upgraded.

Have a good night ?

So this is a view bot? How many views can you get from this would you say in around 1 day?

habemueller - August 26, 2017, 7:34 pm

Yess it is and you can activate a click bot in there if you need. That is really diffrent..you can change the timer. You need for this Proxys.

How many views could you potential get using this method? :)

habemueller - August 26, 2017, 7:54 pm

For what do you want to use it? Youtube views? I think if give them 6s for change the proxys and load the site can you made around 14'400 views per day but you can run this tool more than only once at same time ;)

14400 ? or something else. Also how can I know this tool is legit because your account is fresh.

habemueller - August 26, 2017, 8:06 pm

I know what you mean..i added a virustotal scan and you can test it on vm first if you want and it's a portable tool you don't need to install something.

also if you can send to me

habemueller - August 27, 2017, 1:47 am

Yeah buddy the links are under the text preview

Aryan_Ahir - August 27, 2017, 6:03 am

any one tested this? :) .

Noivinmo - August 27, 2017, 6:08 am

So this is a YouTube view bot that uses proxies and basically just watches ads and the video right? Cause if it doesn't watch ads then no money

I just want to use it for the views tbh too, but I will only use it if someone has tested it and there is evidence first because this guy is new to the forum.

Yess exactly. If you use it on bc.vc do you need to wait 3-4 seconds after that it will click automatic when you put the id of the button in the tool take a look to the preview :)

So did anyone downloaded and tested it ?? Its clean ???

Cal Lightman - August 27, 2017, 10:56 am

Can't even download it - Chrome blocks it because Viruses were found.

habemueller - August 27, 2017, 11:03 am

Check out the virustotal link or test it on a vm please and give a reply then thanks

How am I supposed to test it on a VM if I can't even download it. Tried downloading it on a VM and

the same error appears.

habemueller - August 27, 2017, 11:24 am

Download it on microsoft edge or firefox it will work

Yea but I think Chrome has its reasons for this notification.

Whatever, I don't need this program anyways - just wanted to verify the virus link and warn people.

OliFlaw - August 27, 2017, 11:43 am

This guy trying to get us hacked or ?

habemueller - August 27, 2017, 12:46 pm

No really not i only want not more wrong replies on this tread can please someone check it...

Faith Connors - August 27, 2017, 1:26 pm

seems very sketchy, definitely packed/obfuscated with confuserex, but the screenshot section in Malwr is also blank so it seems to not load any windows.

again, doesn't appear to be connecting back to anything which is strange too.

Even Windows Defender says it's a virus, like since when does that detect a virus? ?

habemueller - August 27, 2017, 3:34 pm

Sry i know that it looks sketchy but i'm new i can't nothing for that but sorry. And no it is not a trojan :) can someone other test it please and give us a short reply

You could upload a non encrypted file, maybe it'll remove those "false" positives, or you can make it open source, so everyone can compile it their self.

Musan31 - August 27, 2017, 3:46 pm

Thanks for release, this will be very helpful. Thanks man.

Jimmie - August 27, 2017, 3:47 pm

Are you guys serious? He joined in 2017 and has 13 post this is most likely a virus.

Cool - August 27, 2017, 4:10 pm

most likely a virus boys, DWC

habemueller - August 27, 2017, 5:07 pm

Can you please test it before you made this wrong post? That would be nice thx if you don't trust me run it on a vm and made please after that a correct reply that would be nice
