The design is nothing special but everything is easy to read. There are many pictures in the ebook and that makes everything easier to understand.

And the information rate is also pretty high in this ebook.

~ Content ~

?????

The content is easy to understand and most of the members here should be able to do it. Everything is explained pretty well.

~ Method ~

Its not just one method. There are 3 different methods in this ebook. You can earn money with these methods and just keep it. You dont directly get giftcards or ingame money. You get real money that you can use for whatever you want.

?????

The first method is quite known and nothing special. But it works.

?????

The second one is quite a lot of work to make it profitable but if you invest enough time you can make a fortune with it. It also requires a small investion

?????

The third method is also known but OP provides a nice platform that isnt saturated yet and all in all its a nice way that also works but not that fast I think.

~ Price ~

?????

The price is ok and in my opinion it is the perfect price for the ebook.

(Jan 17, 2018 05:32 AM)Theocritus Wrote: [\[CITE\]](#) Bought this method from OP a few weeks back, and here is my full review:

so before i go into my results with this method so far i will go through the E-Book quality overall.

This E-Book consists of 11 pages, including 2 versions of the same base method (easy or advanced). The easy method requires a good bit less setup time, while the advanced method can take a little while i would imagine with all the extra work needed. Though it should in return give you more profit in the long run.

I have gone with the easy method for now. My setup time was around 2-3 hours, after reading through and having some issues with the later parts of the guide. But after i got it set up it is now 100% on autopilot. (You can do some work yourself as well to make the method semi autopilot but that requires use of the advanced version and takes more time than it is worth in my opinion.)

The E-Book has good visuals in the way screenshots are shown all along the way to help you understand what to do in each step. It is also laid out and organized well. You get many options of websites/sources to use to get the method set up, though to me this is more of a negative than positive. Personally i tried one of the ones listed as "working", but in the end had to switch because that one source was no longer working with the method. This happens twice in the E-Book and i would personally have liked to have more of 1 to 2 sources that are highly recommended, with the rest listed as optional sources, to make it a bit easier to guide me in the right direction at the start. This problem also happened with the last part of the setup, where you have 13 options of where to get the final thing needed to set up the method to make it much more efficient. I had to go through 7 of the ones listed before getting to one i could actually get working and download and all. To me this was a lot of wasted time, and i would have wished the E-Book would have had as said above 2 recommended ones, so that that would have been easier to set up and also saved me a good bit of time.

To get this method set up as well, you will most likely have to invest another \$10 to assure it will work properly and also give you a boost in earnings, like i did myself.

A major point here though that i would like to make is that this method is called "Gift Card Generator", but you will receive all your payments via PayPal, or perhaps a service like Payoneer. You will not get paid in gift cards. To me this was sort of a surprise as i thought having read the title and thread of this product, that i would be getting gift cards in some way or form, but that is not the

case. Sure, you can buy gift cards with your earnings from PayPal and such after, but then why would you call it "gift card generator" in the first place then? (Website is listed on where you can buy gift cards with your earnings.)

When i contacted Duepi about support he was fairly quick and did a fine job providing me with the help i needed to get it all set up.

Now to my current earnings with this guide. At this moment i have let it run autopilot with fairly simple setup, and these are my current earnings after 3-4 days.

Now as i said earlier, this is the easier setup of the method, and also the less profitable one. As also said this is far from the most efficient setup i can have with this method. If everything goes well, i have plans to 10x my current setup, making much more than i am currently.

If i did not already mention this, this method is fully scalable, meaning you can ramp up how much you make to the level you want yourself, to a certain extent. Keep in mind the more you scale this method, the more initial time for setup is required, and the more monthly maintenance is required. Monthly maintenance should not be more than a few hours or so, if everything works as it is supposed to.

Conclusion

To me this method is worth the price, as you can without too much effort at least make your money back, and then just sit, relax and let it continue making some passive income for you. How much all depends on you.

This method is also one of the more unique ones i have seen on here lately. And as it can be fully autopilot, after setup there is nothing better than having money just slowly chipping into your wallet.

This is an overall good quality working product, and you should at the very least be able to make your money back ?

Can't disclose but this indeed allows to get Gift Cards as rewards. The updated version will just focus on that rather than on the following step, which is redeeming the gift cards to gain free apps and in-game currency. Guess it's fair.

This guide is not about creating Spotify accounts, it teaches how to obtain Spotify Gift Cards (and other ones)

Ombra - October 11, 2017, 12:39 pm

All pending orders have been elaborated correctly. Thank you for your purchases.

Ombra - October 14, 2017, 11:54 am

I have decided to provide a £10 Google Play gift card obtained with this method to a random user that will purchase this guide within the following 24h.

To verify you purchased please post the 16 chars serial key obtained along with the download link (make sure to do it only after you've redeemed it at rogue market)

Ombra - October 15, 2017, 11:57 pm

The contest has been extended for another 24h. 2 More gift cards left to be given out within the following days.

Hi, you can obtain a variety of Netflix (and others) gift cards, depending on availability, not prepaid time ?

Ombra - October 19, 2017, 1:21 pm

To people messaging me about this.. please read thread title. We're talking about Gift Cards, not cracked accounts :(

Ombra - October 23, 2017, 3:29 am

The 25% discount offered at Rogue Market will be valid until tomorrow and GC Marshal is covered by that. I suggest checking it out now to save \$5 ?

Ombra - October 28, 2017, 3:46 am

My sincere apologies to the ones attempting to purchase this night. I had an issue with my PayPal account and it hasn't been available as payment method.

Everything has been fixed now.

One chapter of the guide includes VPS, it is a virtual provate server and you can google for it :)
The ones involved are Windows based, in any case.
Regarding our promotion, it is currently OFF :(

I go the method a while back and it started very well.

I was making anywhere from \$0.5 to \$1.25 a day.

Everything seemed to go well, however when it was time to get paid my account ran into unforeseen issues.

I spoke with the author about it and he assured me that this has only happened to me and no other customer of his.

So I'm not saying this ebook is bad not at all, I'm just saying I failed to get results.

Maybe I did something wrong I honestly can't say that I didn't.

Decide for your selves ;)

Harm you in the beginning? No i was interested in buying. i knew if i asked you if you used it you would have lied so i just asked you if you had Gift cards.

You cannot sell what you dont have and since you claim to sell a 'method' inside your ebook that allows you access to unlimited gift cards, Seems odd that you dont have any for sale yourself.

I wouldnt buy this ebook personally because the seller himself clearly does not use the method. Simple.

Are you really this much demential to believe everything rotates around HF marketplace? I'm currently attendind uni and I'm selling the methods I've used while I was in high school because now I don't have time anymore to use them. I spend more than half of my daily time attending lessons, splitting what remains between sleep and friends. I even needed a partner to help me with sales as I don't use HF as much as in past.

I just don't have the cards because I'm not willing to think about other things like managing servers, even if that's 1 check up per day. Now apply this to each guide I'm selling. Each one would force me to little daily tasks that wouldn't allow me to stay focused on my main target.

You know nothing, I didn't have to justify what I do with MY time but you're really irritating me because you're too much low minded to realize people may be doing other things in their life except selling stuff on internet.

i would think someone who is supposed to be attending university would be able to form Coherent structured sentences. With that aside it sounds like you need extra passive income. Like what your selling to others with these ebook(s)?

I think you should condense your eBooks into one short one. Once you sell it you should say inside "do what i do and sell ebooks on HF". That will probably be the best ebook ever on HF. Feel free to

rip that off by the way. At least people will stand a chance of making money. Clearly its working for you.

On the subject of justification, pretty sure this entire sentence is about you trying to belittle me and feel better about yourself. You win, well done.

I just purchased this and after reading over it, it was clearly a mistake to do so.

This is a complete waste of time and the amount of time taken to get the gift cards is ridiculous - it involves a lot of advertising in order to get the funds to get the gift cards which is ridiculous.

I would ask for a refund for this but I know that the seller won't provide one.

Also would like to point out its extremely difficult to do for myself, considering I am based in the UK.

Dear user,

1) I have no idea why it would be hard for you since you're inside UK. Country means nothing for this guide.

2) I hate when people come out complaining by saying that I wouldn't provide refunds without ME first.

I would have been open to hear what issue you are having with the guide, help you out to fix them and, if that shouldn't work, provide you with a refund or a partial refund.

The fact that you're openly criticizing my guide, without even checking ALL of it, as I see you didn't redeem the license key to access extras, let me thinks that you're just talking shit without taking time to even attempt to understand the guide.

You CAN'T come sale trashing threads with insinuations like "scamming people out of money with worthless e-books" without actually knowing ebook content or having dealt with seller.

"Methods of which can be found on google."

You have NO IDEA what I'm selling because you actually NEVER bought any of my guides. You're just stalking this thread and taking the chance to complain whenever you feel you would gain public

respect by claiming ebooks are shit.

Most of all, the "DWC on this user" is just shit. I'm a serious marketer active on here far more than yourself.

Glad you found your way to farm +rep by posting fake stuff about ebooks you never read.

I would have been open to hear what issue you are having with the guide, help you out to fix them and, if that shouldn't work, provide you with a refund or a partial refund.

The fact that you're openly criticizing my guide, without even checking ALL of it, as I see you didn't redeem the license key to access extras, let me think that you're just talking shit without taking time to even attempt to understand the guide.

You CAN'T come sale trashing threads with insinuations like "scamming people out of money with worthless e-books" without actually knowing ebook content or having dealt with seller.

"Methods of which can be found on google."

You have NO IDEA what I'm selling because you actually NEVER bought any of my guides. You're just stalking this thread and taking the chance to complain whenever you feel you would gain public respect by claiming ebooks are shit.

Most of all, the "DWC on this user" is just shit. I'm a serious marketer active on here far more than yourself.

Glad you found your way to farm +rep by posting fake stuff about ebooks you never read.

Get a job for \$10/hr and then you can buy stuff.

I would just like to say that there seems to have been a good amount of shade thrown at this product, from people that probably have not read through this properly or even tried setting it up. this method can be fully autopilot, and as said above it does not matter where you live at all. when it comes to earnings and reviews, i will update with that in the near future

Theocritus - January 17, 2018, 4:32 am

Bought this method from OP a few weeks back, and here is my full review:

so before i go into my results with this method so far i will go through the E-Book quality overall.

This E-Book consists of 11 pages, including 2 versions of the same base method (easy or advanced). The easy method requires a good bit less setup time, while the advanced method can take a little while i would imagine with all the extra work needed. Though it should in return give you more profit in the long run.

I have gone with the easy method for now. My setup time was around 2-3 hours, after reading through and having some issues with the later parts of the guide. But after i got it set up it is now 100% on autopilot. (You can do some work yourself as well to make the method semi autopilot but that requires use of the advanced version and takes more time than it is worth in my opinion.)

The E-Book has good visuals in the way screenshots are shown all along the way to help you understand what to do in each step. It is also laid out and organized well. You get many options of websites/sources to use to get the method set up, though to me this is more of a negative than positive. Personally i tried one of the ones listed as "working", but in the end had to switch because that one source was no longer working with the method. This happens twice in the E-Book and i would personally have liked to have more of 1 to 2 sources that are highly recommended, with the rest listed as optional sources, to make it a bit easier to guide me in the right direction at the start. This problem also happened with the last part of the setup, where you have 13 options of where to get the final thing needed to set up the method to make it much more efficient. I had to go through 7 of the ones listed before getting to one i could actually get working and download and all. To me this was a lot of wasted time, and i would have wished the E-Book would have had as said above 2 recommended ones, so that that would have been easier to set up and also saved me a good bit of time.

To get this method set up as well, you will most likely have to invest another \$10 to assure it will work properly and also give you a boost in earnings, like i did myself.

A major point here though that i would like to make is that this method is called "Gift Card Generator", but you will receive all your payments via PayPal, or perhaps a service like Payoneer. You will not get paid in gift cards. To me this was sort of a surprise as i thought having read the title and thread of this product, that i would be getting gift cards in some way or form, but that is not the case. Sure, you can buy gift cards with your earnings from PayPal and such after, but then why would you call it "gift card generator" in the first place then? (Website is listed on where you can buy gift cards with your earnings.)

When i contacted Duepi about support he was fairly quick and did a fine job providing me with the help i needed to get it all set up.

Now to my current earnings with this guide. At this moment i have let it run autopilot with fairly simple setup, and these are my current earnings after 3-4 days.

Now as i said earlier, this is the easier setup of the method, and also the less profitable one. As also said this is far from the most efficient setup i can have with this method. If everything goes well, i have plans to 10x my current setup, making much more than i am currently.

If i did not already mention this, this method is fully scalable, meaning you can ramp up how much you make to the level you want yourself, to a certain extent. Keep in mind the more you scale this method, the more initial time for setup is required, and the more monthly maintenance is required. Monthly maintenance should not be more than a few hours or so, if everything works as it is supposed to.

Conclusion

To me this method is worth the price, as you can without too much effort at least make your money back, and then just sit, relax and let it continue making some passive income for you. How much all depends on you.

This method is also one of the more unique ones i have seen on here lately. And as it can be fully autopilot, after setup there is nothing better than having money just slowly chipping into your wallet.

This is an overall good quality working product, and you should at the very least be able to make your money back ?

After reading this reply, honestly it looks and sounds like a lot of work. Have you been able to cash out from the screenshot you showed us containing your earnings? I could imagine it requires a verified paypal, etc.

OP, what are the requirements I need to do this method? I use a Mac, is that a problem? Do I need Photoshop skills?

Does this use shitty apps that give you money for downloading other apps and it takes forever to get a \$5 gift card? Or something involving automation or botting with bluestacks ?

Still testing some new free vps provider for the next update, Hope you can appreciate this effort

Hexxus - March 15, 2018, 3:56 am

This method looks interesting, but I have a few questions before I buy it.

On average, how much could I earn in gift cards per hour?

Is there a limit to the number of gift cards you can generate, or is it unlimited?

How much work is required to earn gift cards with this method?

Honest review of this ebook

So I purchased this ebook a few days ago and I have to give it 2/5. First of all this method is extremely known and public. You're not required to invest money but if you don't invest you really wont make any money. This uses VPSs, The list given is a copy and paste and is a year old so alot of them dont work. The method it's self is extremely easy and fairly autopilot. The ultimate question is can you actually make money. The answer is yes but not much really. Also the name "Gift Cards

Generator" is extremely misleading. The only way gift cards are involved in this method is by you purchasing them from your earnings which can be cashed out to PP/BTC/Skrill. Overall I'm not very impressed with this ebook.

duepi - June 25, 2018, 10:27 am

Planning to add a list of all supported cash out options that works with this guide.

duepi - June 26, 2018, 11:42 am

There's one thing called 'night' and another thing called 'patience'. You're dealing online and you may wait up to 24 hours before getting an answer due to different time zone. You should be happy when it takes less than 24h to get an answer, not angry or frustated if it takes more than 4.

Secondly, the guide has been delivered, automatically and immediately after your payment, to your Rogue Market internal inbox as it is written in the only page you can see when trying to browse any other page than 'Contact' one at Rogue Market, but it looks like you didn't take time to familiarize with the site and directly visited the support page, without understanding how delivery works.

To conclude this, you have contacted the wrong support agent by using the wrong subject (product) from support dropdown menu (contacting me instead of duepi, as I don't manage this specific guide) and you sent multiple support emails with same message.

Please read what's around you and familiarize with every website you use before complaining or asking for support. This is some constructive criticism for your online experience.

1) programs have to be run in VPS, not your own computer. This means there's no matter about computer safety.

2) point 1 leads to having the '18+ warning' useless, as you don't have to stuck in front of your computer. Also, that's just one type of content that may be served randomly to the server, and in any case there's no control over that.

Product IS indeed risk free and legitimate

Unfortunately I cannot force customers to start a Contract or come back to post a feedback.

That's enforced by the fact that orders are processed inside my own website, so I can't match an HF account to send a reminder.

If sellers would stop selling their products because nobody is posting feedbacks, marketplace would be dead. ?

If you are a user looking to buy this, I warn you. Please read the rest of this review before purchasing. To start off, the claim of "unlimited free gift cards" is at the very best, misleading. When purchased, you will be given a link to another website where you will be able to claim the PDF (14 pages). It has numerous grammatical errors and screenshots that are outdated (One even dating back to 2015) as well as very little valuable information. The "Gift Card Generator" is not what this is at all.

You do not make gift cards from this "method" (All public information) but instead get small bits of money from viewing ads. After 10 minutes of viewing these "ad websites" through a program recommended by the PDF, I had 1 website with malware, 2 with fraud and 4 with spyware. This gave me 6 redeemable visits to my own "website" (You make money from others visiting it) but

would earn me little to nothing, as 30,000 visits (shows in the PDF) was the range I was aiming for. As well, the "extras" are just links to VPS' you can sign up for with free trials. Google "VPS trial" and you'll get the same result.

In conclusion, the claim "safe for users" is false. This is not a gift card generator, nor is it free. You are spending your time, money and security by following this guide.

There is a reason the last positive review was 9+ months ago.

One final note, I attempted to receive a refund due to these claims, and was disputed that the information was true. This is a flat out lie, which is why I'm leaving this review. I can live without the \$20, but having this and numerous other "deals" running on the forums misleading users is unacceptable. If I do receive my money back, I will update this review notifying others that their money won't be lost forever if they do decide to purchase this.

To start off, the claim of "unlimited free gift cards" is at the very best, misleading. When purchased, you will be given a link to another website where you will be able to claim the PDF (14 pages). It has numerous grammatical errors and screenshots that are outdated (One even dating back to 2015) as well as very little valuable information. The "Gift Card Generator" is not what this is at all.

You do not make gift cards from this "method" (All public information) but instead get small bits of money from viewing ads. After 10 minutes of viewing these "ad websites" through a program recommended by the PDF, I had 1 website with malware, 2 with fraud and 4 with spyware. This gave me 6 redeemable visits to my own "website" (You make money from others visiting it) but would earn me little to nothing, as 30,000 visits (shows in the PDF) was the range I was aiming for. As well, the "extras" are just links to VPS' you can sign up for with free trials. Google "VPS trial" and you'll get the same result.

In conclusion, the claim "safe for users" is false. This is not a gift card generator, nor is it free. You are spending your time, money and security by following this guide.

There is a reason the last positive review was 9+ months ago.

One final note, I attempted to receive a refund due to these claims, and was disputed that the information was true. This is a flat out lie, which is why I'm leaving this review. I can live without the \$20, but having this and numerous other "deals" running on the forums misleading users is unacceptable. If I do receive my money back, I will update this review notifying others that their money won't be lost forever if they do decide to purchase this.

I'm hosting this sales thread on behalf of Duepi. What I can say is that if you were convinced this was some kind of program, then you don't have eyes to read.

The PDF you mention is exactly what you pay for, and it is readable using our marketplace -the same site where you paid for the product- and not some sketchy 3rd site.

The programs you mention have not to be run on your own computer but on external servers, as recommended in the guide, so no matter about them being safe or not. It's not your computer to be exposed so you're free from risks.

You're just crazy if you use your main computer, breaking guidelines.

You're just a liar if you claim that this product is unsafe, because you clearly didn't understand it fully.

To conclude, you didn't want to discuss. You opened a dispute via PayPal violating our ToS, where we clearly stated that refunds are possible if you contact us first -unless you're an immature kid, of course. As such, your license has been revoked and you've been permanently banned from our site.

We don't deal with kids.

I'm sorry your frustration for not getting your money back immediately took you here to rant shit about this product. On a side note I can let you know that you're abusing PayPal with your unauthorized dispute, and it will be fought hard. You got what you paid for, and PayPal will be notified about it.

Analyt1c - October 15, 2018, 11:55 am

I'm not going to argue with you here over \$20. I am not "ranting shit" about the product, and was told that you "prefer customers to freely review the products purchased". That is exactly what I'm doing. I'm sorry you're displeased that I gave an honest review of the product. There's a reason no one else has given a positive review lately. It's pathetic that you're stooping to a level in which you insult me and argue over \$20. If you were open with your product and refunds, this problem never would have happened. Before writing this review I said that I wouldn't write it if I was given a refund. It was not escalated to Paypal at that point, it was just between me and you. You escalated it to Paypal, not me.

I'm not arguing for the \$20. I'm talking about the attitude.

The point is that we want to discuss with our customers if there are issues concerning our products, and it didn't happen this time, hearing my partner Duepi.

You didn't show a mature attitude by opening a dispute without contacting us first. You assumed you got everything clear about the guide, while you clearly didn't, but you didn't bother questioning Duepi.

Additionally, you felt in right to trash this thread, leading me to defend our position, as it is explained in our about page: <https://roguemarket.org/about.php>

Sent a PM to you

Kaleb - December 30, 2018, 10:55 am

Just bought this. It's no good.

The ebook isn't even tailored to what it says it is. The method is a very public method that has been around for ages that allows you to get paid via PayPal, at which point you're told to go buy a gift card with the earnings. The way this is advertised is very misleading and again this is just a public method being advertised as something else.

I suppose you could end up getting gift cards from this but I can't imagine it would be very quick, and again you can find this method free on here and other websites.

Don't waste your time with this. It's completely misleading and I'll probably be trying to get my money back on PayPal even though it's only 20 bucks, more out of principle.
