Thread: [Undetectable web shell for backdoor?](#)

Banana cum swap - August 27, 2017, 6:50 am

Basicly i have the cpanel access on the website , but when i upload the web shell for backdoor i refresh the directory its nothing there (gets deleted). Is there any way to bypass that? Thanks

hey this is my private method works for bypass root scanner on public_html first try to change public_html folder name to public_html2 then goto upload your shell into it and upload will be successfully then rename folder to public_html :) goto access your shell :)
