Great and trusted guy to deal with

ive make the thread design for him and all went smooth

GLWS mate

One of the best turboers on the market. Arrow showed it to me and it can run requests faster than Usain Bolt.

Energy Wizard - August 27, 2017, 8:04 am

How does this product compare to other turbos speed wise? Proxyless? This does indeed claim usernames right? Thanks.

TheMagicalDragon - August 27, 2017, 8:07 am

Does this reflect on any of your past turbos ? I have some xbox ones from you, life time that don't even work since the new xbox com update ?

ida - August 27, 2017, 8:19 am

I got to test this a few days ago. Great product from the one and only true pig god.

Good luck with the sales!

Good luck with the sales!Did you test the Xbox one ? how long did it turbo for etc did it claim the gt did it claim the gt 8 hours later ? what exactly did you do to test this.

Sadly, I did not use or test the Xbox version, only the ones related to social media sites - Instagram

and Twitter.

Update: All HyperTurbo lifetime customers can send me proof of purchase to receive 10% off

Career - August 27, 2017, 9:17 am

I'm interested in the lifetime license but I'd like to see how the Xbox turbo works first. Are there any vouch copies?

Sorry, I don't give out vouch copies. Maybe if I was a new seller that would make sense

Beast - August 27, 2017, 9:34 am

i just bought it when i get it ill post on how it works

Don't think this will work for gamertags. Lmk.

May not be a new seller but it is a new product. Hyperturbo wasn't all that so I'm a bit skeptical about this one. Another reason is that most turbos get blacklisted so you have to be changing your IP address every hour or so etc. I totally understand though, I'll wait for a review.

Litcoin, the new coin xd?

jk good luck with sales.

Please write a good review because I purchased Hyperturbo from him and it barely ever worked don't want to waste \$40+ On something that doesn't last again. No offense to OP. I'm trying to swap my GT safely and I know someone is after it so this would be wonderful please review quickly.

Hyperturbo worked very good from 2015 to early 2016. Then it just stopped working. I'm waiting for reviews before I even purchase anything though because many Xbox turbos go to shit after a while.

I'm waiting on someone to write a review, I'm not writing one as I haven't bought this yet. One of my boys bought this and is saying as of right now is not working.

I was referring to the new xbox.com lay out my mistake yes it did work but once the new website / change GT was changed it never worked correctly.

carcossa - August 27, 2017, 10:27 am

i can vouch for this product personally

TheMagicalDragon - August 27, 2017, 2:39 pm

Heard from two people the Xbox module doesn't work 75% of the time and doesn't claim.

Can you try fixing it and let me know once fixed I'll be a buyer.

Not sales trashing I really need a working one to use for myself.

Doxicity - August 27, 2017, 10:44 pm

Looks like yet another very promising product from arrow.

I'd bet it's quicker than any other turbos on the market, ideal for securing or swapping.

Lol, I dont think he'll tell someone new his tag.

Anyways, vouch for Arrow, turbod a couple igs in the past. Might be interested in this.

Also how your username is "Tagtaker" lmao dead giveaway..

Offer - August 28, 2017, 5:59 pm

Does the Xbox Turbo actually work? I need to swap a tag.

Yes it does

(Aug 28, 2017 09:16 PM)YummyGumDrop Wrote: [\[CITE\]](#) Doesn't claim the tag 80% of the time tested today finally.

You don't even own the software dumbass

(Aug 29, 2017 12:01 AM)Suspect. Wrote: [\[CITE\]](#) Any Public turbo is going to be garbage. If it were good it wouldn't be released especially for a mere price.? Trust me.

Please show me anyone else selling a Turbo and I will surely trust you

All: Sorry for the delay in responses. Houston got fucked by the storm and getting on Hackforums was obviously not the priority

New update has been released. All current customers can pm me to receive the update

M1ikey - August 30, 2017, 4:19 pm

This product can check which gamer tags are available? Like if someone changes their gt it will notify?

Flaxpicker - August 30, 2017, 7:57 pm

It seems like xbox times out after a certain number of attempts in a minute. I'd like to fix that before I resume sales. Current customers can pm me for a refund.

Will do some regression testing before reopening the thread. Expect the prices to rise once this is fixed.
