Thread: [Blue Screen of Death \(BCD error\)](#)

Powdersnow - August 27, 2017, 1:18 pm

So we got this here, what is the BEST method to solve this problem cuz there's a bunch of BS out there.

5chn4pp - August 27, 2017, 1:23 pm

What happened just before this happened? Can you get to a cmd prompt?

Phlox - August 27, 2017, 7:07 pm

Please boot your computer with Windows Setup Media and from [Windows Recovery Environment](#) start the Command Prompt.

Please type below commands into Command Prompt and press Enter key.

Following commands will repair Master Boot Record (MBR), Boot Sector and BCD Store.

Code Bootrec /FixMbr

Bootrec /FixBoot

Bootrec /RebuildBcd
