Thread: [Whatsapp bulk message sender with C# \[How to do it?\]](#)

assashakan - August 28, 2017, 1:58 am

Hello dear friends. I need a program for sending bulk messages to Whatsapp for marketing. It should send messages to 8 million whatsapp number in 1 month.

Is this possible to send these messages with C# program? If it is can you help me how can i make this project?

Ninja - August 28, 2017, 6:07 am

Yes it is possible. I suggest you learn to program, figure out how Whatsapp sends their messages (decompile the app, sniff the packets, etc.) and bob's your uncle.

Agree with Ninja unless you have enough money to buy aftermarket prepaid scripts to do that.

I was myself looking for similar ones years ago.
