Thread: [How could I make a AntiBot?](#)

SIM-2646138 - August 28, 2017, 12:11 pm

Hi im working on a client right now and im wondering how I could make a decent bot like Sigmas (for servers like Hypixel and Mineplex)

Si1lence - August 29, 2017, 8:04 am

there is thousands of ways to write an anti bot all you have to do is write some checks to make sure a player is really a player and not a bot for example you can check names,teams,head rotations, ticks existed and lots more.

CODE A DEEP LEARNING AI WHICH WILL SCAN FOR STUFF"

hm, that could be an interesting concept for me to mess around with, Thanks troll ideas.

Log lots of data about the bot entity you are trying to block. Compare the data to normal players. Fix false positives

IIRC Sigma and other clients on hypixel just check nametags for the 'reset' chat formatting unicode.

Some bot plugins do add them in tablist.
