Very clean and nice colors. Would love to see a darker version of this.

I love it. I bet you'd be really good for making Flat UI's for Phone App games. Great job man.

Very nice! Any chance I could ask you to remove, or resize, the watermark so I could use it as my desktop background? :)

Thank you mate

and yeah sure pm me with your desktop background size

+ I really like the color palette, and the correct and soft use of the gradients to add depth while keeping the flat look.

- I don't like the drop shadow in the center circle, being not very consistent with the general look&feel. Also i see a barely visible white/transaprent circle below it (maybe and exporting problem)

Thank you so much ? appreciated mate

youre right but its not a shadow its a grandient from dark purple to lighter ?
