Lextian - September 7, 2017, 3:04 pm

OP, you need to make a video showing your making the doc file, then run the exploited file and attach to send via gmail, just to confirm it fully works.

Am very much interested in buying this but too many fake exploit sellers out here so am very caution.

And GLWS.

The video was uploaded to prove that exploited (output DOC), DOC file executes the virus silently.

Also the current scan result is provided on the main thread that you can check.

Once you make purchase of builder, you will be given full builder and build process will be shown to customer. For now working proof is attached to main thread.

what is the builder coded in?

do you charge for reFUD?

does your own exploit still works till july 25th after the update?

and your scan was 0/18 why not try scanning with viruscheckmate.com? just a thought though

- Builder is coded in Python.

do you charge for reFUD?

Refud is same as returning client.

does your own exploit still works till july 25th after the update?

Yes exploit works perfectly over all office version and it is completely FUD.
and your scan was 0/18 why not try scanning with viruscheckmate.com?
Sure, VirusCheckMate.com link will be provide to you as well

Riddick - September 15, 2017, 1:18 am

Seems like a promising service, however I wouldn't use Jotti to scan any files.

Their privacy policy says:

"We store files you send in for scanning and share these with anti-malware companies. We do this to help anti-malware companies improve the detection accuracy of their security products."

Hi there mate! Forgive me for my question but just read you used python and since I've already leaarned the basics of python and so on, I thought I could ask you for some hints where to move on from there (like what guides,tutorials,books or what's next to learn).

I know it has nothing to do with the sales thread but I thought I could ask you for that.

That said, thnx and good luck with sales!!!! ????

Theo™ - September 16, 2017, 11:53 am

Builder is still FUD and up for sale.

Contact to order yours ?

However the current scan result link is updated to main thread.

Exploit is FUD, contact to order now ?

HawkEyeXXX - September 19, 2017, 1:36 am

I am not trashing your sales thread but you even don't know where have you uploaded your file for scanning. Jotti distribute samples to AV companies. GL on reFuding and with sales.

tesla-hobbit - September 20, 2017, 6:39 am

Is the exe file built into doc after exploit apply ? Or it is downloaded from url after doc running ? Also, could we chose our own doc file with custom text ? For example marketing information ?
