Thread: [I feel a little need to brag. 50k+ profit in under 6 months.](#)

Talent . - August 29, 2017, 12:24 pm

So a few months ago I invested in Xrp before it blew up and ever since then have been doing pretty well.

I bought with \$1,000 right around the one cent mark and sold between the 37 cent and 30 cent mark.

From there I bought Into Strat Sia, Omg Eth, Adex and a few other random coins.

Currently I have 38 Eth, 2,000 Strat and 2,600 Omg all in offline wallets and Bittrex.

About to move all my Omg off Bittrex too so figured I'd brag for a minute while it looks beefy. ?

I know it's not life changing money yet, hopefully though in the near future it will be so I can help out my family and be able to travel around for a while before returning back to work

Very nice job, good luck with your ongoing investments.

Congrats! I started with \$5k during the crypto boom and bought stratis at like \$7.90 ea lol. So I'm about even now, but I have some ETH,BAT,OMG, and a few others.

I made a solid \$1k on NEO in about 2 weeks as well.
