Thread: [phpbrute - cracking modules \(Free / Open-source\)](#)

Conscious - August 30, 2017, 12:57 am

Hello everyone!

some of you may have seen this amazing tool that was made by @Yani and some of you may not have!

[Link to thread](#)

But as @Yani mentions on he's thread Quote:phpBrute is a threaded web-automation tool. Its main purpose is either pentesting or threaded web automation.

I have made some modules for PHPbrute you can use to crack different accounts with!
You can also request custom modules and depending on the module I might ask for a small fee for my work.

These modules are for informational purposes only and I will not be responsible for your actions!

Crunchyroll.php:

More modules will come soon.

Anyone who got ideas for new modules they want?

Conscious - September 4, 2017, 10:26 am

Still wondering if anyone have any cracking module requests.
