Thread: [WSO Shell - w0rms - lcfkdshell - Botnet](#)

Fix3d - August 30, 2017, 4:07 am

Hi,

I don't know if i'm right here, but I guess it's going to be okay.

So recently I found those skid tools for shellcode injection .php I don't know if these sources are infected or in other words, safe to use. Could some1 check it. 'Cause the offers look really great.

<http://www.w0rms.com/>

<https://sourceforge.net/projects/icfdkshell/>

DARPA - August 30, 2017, 4:12 am

Well it's ummmm malware so it's gonna be malware.

Fix3d - September 1, 2017, 2:48 pm

I guess I'll try 'em in a VM/Sandbox

OMGitsBilly--E - September 1, 2017, 5:55 pm

I'll try this in my VM lol

Fix3d - September 11, 2017, 1:42 pm

Maybe this is just by accident but there might be a connection between them...

w0rmer -Hacker been seized...The names are obvious.

Try these PHP Shells !

[b374kshell.zip - AnonFile](#)

[c99shell.zip - AnonFile](#)

[r57shell.zip - AnonFile](#)

[wsoshell.zip - AnonFile](#)

Password to shell : pass

All the things you posted are already in the OP's linked sites.

And this thread has been unused for 2 years lol - Also it's not an update as you aren't the OP (unless you are multi-accounting).
