Thread: [UBQ \(Ubiq\) quarterly report just around the corner](#)

Anakin™ - August 30, 2017, 5:52 am

Ubiq quarterly report was announced for 3rd or 4th week in August. It hasn't been out yet, which means it's coming out in the next 48h. It has been confirmed by official Ubiq staff member on their Slack an hour ago. [screenshot taken by me](#).

What we expect in the quarterly report:
Sphere is coming to the Ubiq blockchain.
2 tokens are moving to the Ubiq blockchain: GEO and Bitseeds.

Observing:

A lot of miners have switched to mining Ubiq making it the 2nd most profitable coin to mine on Ethash right after ETH according to whattomine.

Edit: this changes on a daily basis.

My prediction: the price will go up a lot, by at least 30% of the current price (0.00065060).

My advice: buy and hold for a minimum of 30 days. I will post the result here in 30 days.

Disclaimer: do your own research before investing in Cryptocurrencies.

My advice: buy.

UBIQ have already risen quite a bit in the past few days, let's see how it goes! ?

MANNAM - August 30, 2017, 6:10 am

Interesting. I'll be keeping an eye on this!

Anakin™ - August 30, 2017, 6:44 am

Edited OP with some more information.

Anakin™ - August 31, 2017, 12:26 pm

The quarterly report is out:

Vitriol - August 31, 2017, 3:00 pm

Holding about 800 of these , hope to see this coin become \$10 one day. About to read the report now

Marina Nagasawa - August 31, 2017, 4:14 pm

Bought about 1k coins myself two days ago, it's been in the 0.00060- 0.00065 range since then. Hopefully this news will bring about a nice spike.

EziNet - August 31, 2017, 9:54 pm

Bought 100 Ubiq because of this. now in redzone ?

People care more about the reaction to the news rather than the news itself.

The news are huge imho. Let's see where we are in 3 weeks. I bought A LOT of Ubiq a week ago as well.

thrudda - September 1, 2017, 3:25 am

Yea, UBIQ is a long term investment. Too many people wanting to buy the coin and expecting it to rise 1000% tomorrow.

Hold on to your UBIQ

RUS7Y - September 1, 2017, 5:41 am

UBIQ is an amazing investment. They are trying to compete with ETH/NEO. Good long term hold.

Vitriol - September 1, 2017, 6:27 am

Hold on to your UBIQ

It's going to be \$10 at the end of the year

Marina Nagasawa - September 1, 2017, 2:01 pm

So how long do you guys think this dip will last for UBQ?

Frebbe - September 1, 2017, 2:16 pm

I think it's just a sort of "weekend dip" so to speak, I imagine 3\$+ by monday, I suggest getting in now tho, very nice currency for Long-term, better version of the Ethereum, and could easily be 10\$ by the end of the year if it takes of.

Vitriol - September 1, 2017, 8:44 pm

Ubiq is shutting on me right now. Bought at a terrible time

thrudda - September 1, 2017, 10:02 pm
