Thread: [Twitter Image Improvements](#)

Cammy - August 31, 2017, 11:42 am

Twitter Image Helper modifies image sources so that the best available image quality is always being used in tweets.

Also adds a download button for images in tweets and redirects direct image links from Twitter to show the largest available size.

Also: No more jpg-orig etc. image extensions when downloading images from Twitter!

Bugs/issues:

None AFAIK. Only tested on Chrome 60.

[Download](#)

By the way, this code is kinda crappy so if want to improve it by all means go ahead and post here

Hydra - September 16, 2017, 10:54 am

Man this is so useful. Annoys me when I keep forgetting to rename jpg-orig. Thanks a bunch.
