Hello all

I paid \$100 (\$140 in total because I had to transfer it to btc) to Mandarin to hack a twitter account. He said he was going to get it done in a day, but he stopped responding to me after I paid him. He said he was getting it done...It's been a week and still no response... I want my money back, this guy scammed me a lot of money.

LOL, he's still around the forums guys, he PM-ed me on accident after seeing my thread looking for a hacker

Mandarin has reached out to me and OP as well, am settling our dispute, will remove posts if he delivers as promised
