I haven't actually tried this method, but It looks like a decent method. The english is great so it's super easy to understand and has a lot of detailed information.

Seems to be promising, although work is needed obviously. But if you can't work towards making money you'll never make money.

Did you download? It's affiliate marketing. But, I hand over a converting funnel and show you how to use it. If you're already making good money online, then you don't need this. If you're sick of ewhoring and want to get into something more whitehat, give it a go. :-)

If you think Deadz invented this method, you're smoking something.. haha. It is the same method, but a lot of people are using it.
