Thread: [The Mafia | Official Group Sector | Recruitment #3](#)

Elitas - September 1, 2017, 1:16 pm

The Mafia is a loyal, trustworthy and honest group which operate together to make money.

Welcome To The Mafia

We're not blackhat - We're just not nice people.

This is a sector of Revolution which will be launched soon. We are beginning recruitment for this sector today. It is a password-protected sector of the group, separate from the rest of the group.

Welcome to our subforum. We are looking for intelligent users who are interested in joining an active sector who are interesting in making money. This will require a skillset. Although we do bias towards certain skillsets (which I'm not going to point out for obvious reasons), we would like to see what you are skilled in as we are open to all skills! Watching Anime is not a skill! I hate Anime with a passion!

This is the userbar.

At the moment, The Mafia is going to be about a few things. We're looking to see what skills members of Hack Forums have. We'll be looking for members to actively contribute to the subforum with tutorials and guides about hacking, money making, etc. We'll be hosting an active lounge. We're hoping members can contribute to the lounge and help make The Mafia awesome.

Requirements

- You must be actively visiting Hack Forums.
- You must be a positive contributor to the forums.
- You must be skilled in something and willing to share your skills.
- You must be happy to follow the rules for both The Mafia and the entire group 'Revolution'.

The group will be launching soon. I won't be accepting any applications until the group has officially launched. If you have any questions, recommendations or any wiseguy mafioso type things you

wish to discuss, you can private message me and I will get back to you.

I may be biased towards users who have sexy applications and users who are positive contributors to the forum. However, this recruitment is open to anyone who is willing to share and learn!

Interesting group, I am interested in applying, but I don't know if I should wait until I have more to show from what I do. Anyways, good luck to everyone applying.

AlphaIndustries - September 1, 2017, 1:18 pm

Just give me an invite already man.

I will be reading these over and over many times. So there will probably be a bias towards members who post earlier in the thread as their applications will be read more times than anyone else's and I will be recruiting as I go along. THIS WILL BE A VERY SMALL RECRUITMENT. Maybe 2 or 3 members.

I'm not quite sure man.

For those interested: Basically the sector is a more private Bragging Rights sector where members post their earnings. I have noticed that a lot of members are also giving information on how they earned that money so it is definitely educational.

Trappy - September 1, 2017, 1:22 pm

The mafia has so many sick things in it. Someone posted the uber gift card method well over a month ago and another member is doing instagram database look ups. Well worth it to apply.

Mr Meeseeks - September 1, 2017, 1:31 pm

1. Please name your primary and secondary skillsets which you plan to bring to The Mafia:

Primary would be general IT work, and coding (builds, setting up servers, building websites, settings and configuration) Secondary would be Social Engineering, mainly e-whoring (showing people how to make money without blackmailing someone)

2. On an average day, how many posts/hours would you contribute to The Mafia subforum:

This depends on the day, I will be busy with school and work, and college in a year. I would say I can manage at least 5 posts a day, throughout the day, for a few hours when I am busy.

3. Post references/proof of your claims from questions 1 and 2 above:

<https://hackforums.net/showthread.php?tid=5557013>

<https://gyazo.com/5d01cf2aceff2492fc60ac8f151191f0>

I know it isn't much, I plan on expanding my horizons on HF

4. You need to earn \$1,000 in 1 week or else you will lose your house. You have \$500 in your bank account. Apart from purchasing an ebook, what other method would you use to make this income in 1 week:

I would say that trading crypto using a bot would be the best option, low risk for a good return. If I am running out of time, I would say that you could just borrow from friends or take a loan out (If that is allowed?). The only thing I could think of without borrowing would go on a e-whoring spree or resell keys or accounts, try to get lucky with a domain, etc.

Elitas - September 1, 2017, 4:36 pm

This is still ongoing. ?

Free recruitment -> You will require some useful skills that you can contribute though. We need very active members too! We want to move onto our new lounge. :D

1. Please name your primary and secondary skillsets which you plan to bring to The Mafia:

IT & Earning money, my primary skill would have to be IT without a doubt as I currently work and have studied several courses regarding IT for 2/3 years now.

I currently have A-levels and Microsoft qualifications in certain subjects within the huge IT skill-set range which is hugely expandable. I'm willing to help people learn the beginning steps on IT and forward their progress.

- Security
- Databases (SQL)
- Coding (Java, SQL, JQuery etc)
- & the basics.

Secondly would have to be earning money, I'm hugely invested in-stocks and Cryptos but I also enjoy a good bet and held two business other than my day to day job, working hard and earning money is a must to me to be able to enjoy life.

Capz - September 7, 2017, 2:54 am

can i buy into group? can we talk on discord?

Constantine_XII - September 7, 2017, 12:19 pm

1. Please name your primary and secondary skillsets which you plan to bring to The Mafia: I am a business minded man. Others on this forum may be good with computers and hacking and all sorts of such things. I however, am good with financial systems. I used to be part of a pump and dump group for crypto currencies.

2. On an average day, how many posts/hours would you contribute the The Mafia subforum: Maybe 8 a day. (posts)

3. Post references/proof of your claims from questions 1 and 2 above: I was in on the WAVES pump that happened a few months ago and I know the real way (I edited this part after upload because I know it may be against to post this link) {Yoinked first word}pumps.com admins make their money. They have a mining botnet and use the "bet advice" service that was available on A_____y m_____t to figure out who was going to win the sports match before the block chain loaded it. They would then mine said currency, and dump it all once the value had gone up massively.

4. You need to earn \$1,000 in 1 week or else you will lose your house. You have \$500 in your bank account. Apart from purchasing an ebook, what other method would you use to make this income in 1 week: I would purchase 2 paypal account with a transaction history, log in using a the necessary stealth, send my \$500 to the account I just bought, send it to the other paypal account, use charge back to escalate a claim for something stupid like a TF2 hat. Then I would wait for a few days after escalating the claim and put all my money in my main account equaling about \$970 in profit.

The next bit depends on how fast paypal was with the claim. If it took them only 2 days, I would repeat what I just did a few more times up to 2k+ just for good measure. if it took them the entire week, i would go out and mug a guy for the last needed \$30.

Also, info was because the question was asked and is not meant to be of "help" with it. it was an explanation of what may hypothetically happen if I was put in a position.

Full compliance with the rules of the site in this post.

1. Please name your primary and secondary skillsets which you plan to bring to The Mafia: Dropshipping, reselling, and i've just now started to get into investing.

2. On an average day, how many posts/hours would you contribute the The Mafia subforum: I spend about 6-8 hours a day on HF and would likely end up spending at least a couple of those hours within the subforum.

3. Post references/proof of your claims from questions 1 and 2 above:

Also, here are my AdSense earnings: <https://i.imgur.com/ull1Fkl.png>

4. You need to earn \$1,000 in 1 week or else you will lose your house. You have \$500 in your bank account. Apart from purchasing an ebook, what other method would you use to make this income in 1 week:
Exchanging BTC on here. You could likely get it done within 24 hours. It would take 5 transactions at 13% to get there. If you wanted to take the safe route and avoid any risk of chargebacks, you could do 10% to the big exchangers and that would take 8 separate transactions.

1. Please name your primary and secondary skillsets which you plan to bring to The Mafia:
Business and marketing education & any form of graphical work (including video editing)

2. On an average day, how many posts/hours would you contribute to The Mafia subforum:
Well I am currently working as a full-time freelancer which means I have a lot of spare time on the computer. Therefore you can expect me to post at least 10-15 times a day in the group section. I usually spend 8-14 hours in front of the computer and check HF regularly for new threads that I find interesting.

PM me for gfx, video editing, and other business references.

4. You need to earn \$1,000 in 1 week or else you will lose your house. You have \$500 in your bank account. Apart from purchasing an ebook, what other method would you use to make this income in 1 week:
I would purchase a few Instagram accounts with a niche, example 'fitness' and 'food' related Instagram accounts. Then I would setup a Shopify website with my current experience & knowledge. I would then proceed to setup a facebook page for the website and invest a few \$ into facebook niche marketing. My primary segment group would be 'women, age 23+, interested in losing weight etc.' then I would sell some one-meal protein-bars on the website which would eventually help the customers lose weight. This would be done with a drop shipping method since it will take more than a week to receive the products etc.

My second method would be to contact Hackers who have steam accounts and then purchase their CSGO skins/accounts and resell them on different forums. Or I could setup a fake youtube video with a voice-over purchased from fiverr and HQ views purchased from a HF seller and then infect people and hack the skins/accounts myself.
