Thread: [made profit bitcoins from \\$1](#)

**RonzaX** - September 1, 2017, 6:55 pm

I know it's not a lot

but a while back I mined 1 dollar (which I made in a day)

and I had it attached to my blockchain account but I forgot my secondary password and basically abandoned it, I didn't realize I could reset the account with those 12 word codes until today

and now I'm up profit :D

1 dollar to 41 dollars ;D

Wrong section, but congrats I remember when I used to mine 1 BTC every 5 days.

Gambled that and turned to \$1500 loool

Best \$5 of my life
