Might sound stupid but is my profile photo visible? I can't see if it is or not.

[UPDATE] I don't have my pc now but I'll link the image.

It's not there. Remember, regular members cannot upload avatars, they can only link to them.

I suggest you upload your avatar to imgur.com and direct link it to here.

Not there. You'd be able to see your avatar if it had worked.

share your avatar link here lets check it

Its way too big, crop it so it meets the requirements:

Code The maximum dimensions for avatars are: 120x150 pixels.

The maximum file size for avatars is 75 KB

Upload it to imgur and copy the link WITH HTTPS

E.g <https://i.imgur.com/UXDF9za.jpg>

Then use that link as your avatar

I swear to god you should be ashamed of yourself if you don't know how to set an avatar on a technology oriented forum
