What do you guys think about this series? is it worth watching? and in what order should I watch it? also, is the 'human movie' worth it or not?

Kaiba Corp - September 2, 2017, 2:18 am

Yes, Yes it is.

The order really depends, I'd reccomend reading the wiki and follow one of the orders, I went for release date order, the standalone complex is good aswell IMO.

The live action(human movie) is deffinetelly worth it, they did great job visually high end budget cgi very loyal to the original designs, however they stood a bit shallow on the plot even if kinda "loyal" they took a bit from all series with the AI creation beeing the main plot and Makoto's past life as a secondary plot.

Watch the two movies, followed by both Standalone Complex series'. I personally didn't bother with the Arise movies, but knock yourself out.

The movie adaptation wasn't too bad, I'd give it a 7/10 but I'd say be sure to watch the anime, it's obviously better.

Whatever you do, do NOT watch the 2017 version of the movie. Please for the love of anime watch the 1995 version.

It's good but the live action looks like shit

waxt2001 - September 5, 2017, 3:54 pm

I would also recommend the 1995 anime rather than the movie!
