Cool - September 2, 2017, 6:39 pm

My first goal towards the end of 2018 is to be completely fit, having followed my current diet and maybe improving it and keep going to the gym at least 3 times per week, with 2 days of home-workout. I started this year reading a lot and I would like to continue doing so, by the end of 2018 my goal is to have read at least 100 books counting from the beginning of 2018. By the end of 2018 I also would like to see my business grow by selling 10x times as I actually do, I'm having like 4 sales per week so 40 sales per week is the goal, and I know this can be achieved.

I believe strongly on BTC and while I have earned in the past 2 years some I have also spent it and I currently have around \$100 BTC, so by the end of 2018 if I continue investing and maybe even mining; my goal is to achieve \$1000 BTC, not only earned but saved on my balance.

I also have a project already started with some friends about developing a game, I have developed some games already with them and I expect to have finished my current project with them, and having at least 2 more in the works by the end of the next year.

Finally, my goals on this forum by the end of 2018 are the following: I expect to hit 2500 HQ posts and 500 positive reputation at least, I'm pretty sure I can achieve this one as well.

Thanks for making me think about this and forcing me to write this up, sometimes I make lots of plans in my mind and at the end I only execute maybe a third of those plans, therefore I think writing every goal is a very important step into achieving it. Law of attraction. Good luck everybody.
