Thread: [Website banner animation not rendering in PS CC??](#)

exchd - September 2, 2017, 2:42 pm

So I made a website banner in After Effects and I tried putting it into PS CC to Save for Web. It is 1230px x 490px. After I tried saving it, I get this error:

"Adobe Save for Web Error

Could not complete this operation. An unknown error has occurred"

Any ideas?? (It's for a school project.)

What OS are you currently running?

M?xim - September 3, 2017, 1:00 pm

It's because the dimensions and filesize is too big. Make it smaller and shorter.

Fuck u Maxim okay

I thought it said CS6, and I remember CS6 having a problem where it would say something along the lines of this when trying to save for web.
