Shopify Drop Ship Mastery

Become an ecommerce entrepreneur and turn your passion into a living

What Will I Learn?

- How to set up a Dropshipping site on Shopify
- How to pick a niche that customers want to buy from
- How to pick products that sell
- How to optimize product listings and a Shopify store
- How to drive paid and free organic traffic to their store

Spoiler [\(Click to View\)](#) Description

The Dropshipping Model has taken off. There's a reason for that. People want a business that can generate an income for them while they sleep, while they spend time with family, and while they're busy doing the things they love. Who wouldn't?

If you don't know, essentially what Dropshipping entails is upselling the consumer to make a profit. As the "dropshipper," you help facilitate the sale of certain items from a wholesaler (usually overseas) to a customer in a different market place. The customer usually doesn't know they aren't actually buying from you. From this you can shave money off the top and make a profit on each product you sell.

This business model is so popular because there is very minimal risk involved. You don't need much start up at all. In fact, I'll show you how to get start for Free for up to 2 Months. What do you have to lose? On top of that, you don't need any warehouses. You don't need any merchandise. You will never actually handle any products you sell.

I'll take you through the step by step process of setting up a dropshipping site with Shopify 100% Free of up to two months before you have to pay anything. Then I'll show you how to pic a niche that buyers won't be able to resist, pick products that sell, and optimize your listings and site for conversions. We'll then set up the process to be semi-automated and as hands off as possible with a special plug in. Finally, I'll even show you how to drive traffic to your site and really scale it up.

Enroll today. Become the next Shopify Drop Ship Master tomorrow.

PM me and I'll get back to you guys throughout the day.
