Thread: [Need a huge txt file split into 10-20 files](#)

Sharjah - September 3, 2017, 7:47 pm

I have a huge text file that needs to be split up. Paying 5\$ btc for someone to split them for me
The file is 803mb

swavy - September 3, 2017, 7:48 pm

There are web tools that can do this I believe.

I did something similar with DBs long long ago.

I tried a tool called xsplit but it only split it into 4 files and I cant be assed trying to figure out how to split it into more

You could split it into 4 files then split those 4 files in half, totaling 8.

I wouldn't count 803mb as being huge. This is an easy task through the console.

Neos07 - September 4, 2017, 2:14 am

If you still need this, send me a pm.

I can do this for you. You know where to find me, just toss me a link to the file and I'll get it done when I wake up.
