Thread: [Private Battleeye Bypass + NoRecoil, NoSway and NoSpread for Sale](#)

Gaoshou - September 3, 2017, 11:09 pm

Hello,

i am selling access to my private bypass and hack. There are around 10 Slots for this available.

Features:

- BattleEye Bypass integrated
- NoRecoil
- NoSway (no Weapon Movement)
- NoSpread

There are no other Features and I am not planning to add more.

Edit: I will update the hack on Game Updates and such, but i will not add features like aimbot, esp etc.

Since i have no Plans to add any kind of usage protection this will be a one time buy - use forever. The Price is 200€ in Bitcoin or ETH.

The full Source (c#, including bypass) can be sold on an good offer - in that case i will stop all other sales.

Note:

you cannot use that bypass to run CE or chams or any other hack, its integrated in the hack. (dkom + handle elevation)

To buy send me a pm and you will get my discord. If there is need i can offer a standalone version of the bypass.

Thanks guys, have a nice day.

Cyberdroid - September 4, 2017, 8:04 am

Sweet! I already got chams and bypass but not the thing I always like on FPS NoRecoil and etc. just saying

Mr Kake - September 4, 2017, 9:07 am

Hahaha, C#? You definitely pasted...

The-Noob - September 4, 2017, 10:09 am

This aint a bypass. its the driver exploit, GG.

NA Riven - September 4, 2017, 10:13 am

You should try posting this in the sellers section.

jg0d - September 4, 2017, 10:16 am

This is all copy and pasted lol

Gaddovisor - September 5, 2017, 3:47 am

I wouldn't recommend buying this since it is public on UC and most likely to be fixed.

Gaoshou - September 9, 2017, 8:56 am

Update,

Increased Bulletspeed was added as a feature.

Still undetected, 5 / 10 Slots remaining.

Jerry121 - September 9, 2017, 12:51 pm

can you provide a mod or someone with a vouch copy?

MrC0dex - September 9, 2017, 1:21 pm

So you used public code. Changed it a bit and slapped a private label on it. GG its csgo all over again.

A detected feature running on the driver exploit....GG

Cyberdroid - September 12, 2017, 11:06 am

Yeah I am wondering why the injector is still undetected. Lol
