Asked user for a vouch copy and he agreed kindly!

As for this method i have had a read through the ebook it is well presented and easy to follow along,

From reading this i have thought of many different twist's and things you can apply to this method to make it personalised as well as targeted.

I have no doubt using this method you will definitely gain slaves.

Personally i think \$1 is a fair price for the information in the ebook some of you may or may not know this method but if your looking to try and gain some slaves then spend that \$1 :)

How much (time and money) do I need to put in for this method to work?

MonetizeMaster - September 4, 2017, 4:00 pm

You will do the setup one time. And it will take your maximum 2 hours.

If you have a domain and hosting you don't need to spend any money but if you don't have you need to buy them.

Bought this method and here is my unbiased honest opinion

Grammar:

The grammar in this method while reading it is very good with no spelling mistakes and very few grammatical errors!

Readability:

The method it's self is very easy to read and follow, nothing confusing that will get you lost and confused!

The seller:

The seller is a really nice guy and I'm sure will be happy to answer any wuestions or problems you may have!

The method itself:

The method itself is very good, simple and as far as I'm aware it's completely unheard of, it's very simple to setup and can is completely autopilot once setup with little to no work needed ever again!

You can easily rake in around 35-50 bits or more depending on you and how much time you put in although all these bots are most likely very high quality and all real user pc's

Yes I'm still selling and yes it's still working.

You need to do a setup first it'll take your 2-3 hours if you are experienced on wordpress.

If you do nothing after setup google will index your pages in one week usually.

After that your downloads will start.

This is my sites stats.

40 50 visit every day

15 20 downloads

8-10 installs

If you put some more effort this numbers can increase easily.

But I'm not selling miracles for \$1 don't forget that. You need to do some setup work :)
