Thread: [Windows 10 Taskbar Search not wokng when offline](#)

Null. - September 5, 2017, 7:20 am

The problem is that it isn't showing any results, just white plane panel

I've already tried this method, but doesn't fix the problem when im not connected to the internet. [<https://www.windowcentral.com/how-fix-taskbar-search-not-working-windows-10>]

Please help, thank you.

Try doing a repair install of the Windows 10 ISO. Don't worry, it won't get rid of programs/data and apps. It re-install Windows 10 keeping all that and fix the issue.
