Is this a CPU or GPU mining?

MonetizeMaster - September 5, 2017, 5:24 pm

Sorry to forget mention it. It's a cpu miner.

agtd63 - September 6, 2017, 1:16 am

Please tell me weather your miner drop files or inject to process or not.

DinamicoBoys - September 6, 2017, 1:56 am

this miner is native o net?

BenzaHdd - September 6, 2017, 4:34 am

Hello. Can I ask exactly what is this and what's the use of it ? All I know about mining is that the miner gets paid from the fees they pay. How much money is to be made from this ?

It is a silent miner. You can install this miner as many computer as you can. And all of them mine for you secretly.

How much earn. It depends on victim computers specs and numbers.

You can calculate your potantial earnings from:

Here is my vouch for RavenMiner! :-)

I've sent the user a private message to buy his miner a while ago, on his old thread. Luckily for me I've received a vouch copy. I can promise you that this is one of the most stable miners out there, it work's great, doesn't lose connections and has some great performance.

Again a huge vouch for Raven and his miner! :D

What is the average hashrate per client using this?

That does depend on what the clients specs are on the CPU

Dude my conditions are clear. Buy the token and send the information.
You didn't read the thread and complaining now.

Send me your information via pm and I'll setup your miner quickly.

I also send you my skype adress via rocketr already...
