Thread: [Prediction : Binance \\$3 end of month](#)

Rake - September 5, 2017, 11:43 am

Why? Once all the FUD is over with China ,confidence with them will be restored.

Binance was overly effected by all of this in my opinion and has already begun to show signs of a reversal to the top.

CEO Cz said they've got big news coming soon they can't talk about just yet, on an interview with boxmining. Also the token pump with 20% their profits is likely late this month / early next month.

Lots of other things I will type once I'm not on mobile.

Some general confusion / things I'd like to clear up :

The coin does not only serve as a "coupon" for Binance fees, in the future it will be used as Gas on the Decentralized Exchange,

Binance is also going to lose 50% the amount in circulation eventually as the owners will buy back and destroy it with 20% of their profits.

- I see a lot of fud going around about china possibly "Shutting them down" which is just a downright lie.

They are not even based in China and they have no legal jurisdiction over the exchange owners / company.

Time as of this thread : \$0.97

The dip is now.

I've been day trading binance the past few days

Bought 33K BnB and now have 41k without putting extra money in

Mudhoney - September 5, 2017, 2:13 pm

I think it will hit this price. But the only problem I see is China being a communist country that dislikes cryptos has every right to straight up shut down this website.

It would really suck if you woke up and one day it had been shut down. I'm still holding BNB but am at least waiting for around \$3 before I cash out.

Vitriol - September 5, 2017, 2:52 pm

I'm holding 1500 of these I purchased at 85 cents . My only fear is if China shuts their site down since it's not licenced. That would really suck, other than that it's pretty easy to see this coin will go up in value as the Binance exchange is going to keep growing. It's very simple to use & has an amazing team/support backing it.

So much FUD they even had me believing that Binance could be shut down by the Chinese Government. That's all this is, I mean disallowing China IP's on Binance is a pretty big deal, but that doesn't make this a shitcoin. The exchange is still great backed by really trustworthy experienced people.

People have this false vision that Binance will shut down their exchange and take everyones money or that China will shut down the site. Neither of these things will happen, just a bunch of FUD.

This is still the beginning for Binance.

I sold mine, I think it'll dip one more time before we see a real rise. I bought a little too high at 1.5 so if it dips I'll get more.

AyeKei - September 7, 2017, 8:18 am

Joined these forums cause you guys are some of the few talking about BNB. But I am not a crypto noob.

Here is what happened: China pulled a fast one. The ICO ban has already been declared temporary until regulations are made. China simply wanted to choose their winners because that is what communists do. (hint NEO and Binance are the winners) They announced the ban then Chinese cryptos drop massively. Chinese government invests heavily in these projects behind doors and at discounted prices. (probably communicating with the NEO and Binance team). Boom 2 days later they basically de-announce the ban live on Chinese CCTV-13 tv.

What is next? The bull is out. 3 dollars? Get the fuck out of here. NEO and BNB have been let out of the cage.

Bakedman - September 7, 2017, 8:30 am

\$bnb is most likely going to see a steady increase over the next week or so. I would expect to settle somewhere around 44-48k sats. There is also going to be some nice increases on the coins that binance has listed due to the exchange volume increase.

I would advise people read up on \$wtc. I have a feeling this is where the \$bnb money is headed next.

BNB is a good coin, but don't be ridiculous. \$3 is a very reasonable price for Binance.

Won't be selling If I was you. It's a small profit we made today in compare to what's coming. At anytime Binance can announce they got their license to launch ICOs on their platform.

I've been cursing my bank all day for being closed, when BNB was at 0.8.

Wish I sold at \$1.50 yesterday , let's see where it's at in a week.

?Lucky Luciano - September 8, 2017, 8:59 am

Just bought in at \$1.10, a bit annoyed because I saw it at .99c when I made the decision, but hopefully this coin shoots up to \$2 again soon

Vitriol - September 8, 2017, 7:59 pm

Hmm, this is hurting right now. It was just \$1.50 a couple days ago

To be honest this coin is very unpredictable, Better to stay away and look for other options. I've been monitoring this coin from last 4 days and it stays between \$0.85 to \$1.10 atleast for now. Yesterday it went to \$1.50 but then again back to it's normal routine. You can still make huge profit from this coin by purchasing at \$0.85-\$0.90 selling on \$1.10-\$1-20.

FYeah - September 9, 2017, 12:17 am

This coin is great for day trading at the moment. I bought at \$0.83 and sold at \$1.29 when the China news came out yesterday and could see it was going to drop fast. Going to buy in again at around \$0.95..

Batcard - September 9, 2017, 12:45 am

Hmm, i think this coin might have potential. I did however, sell it at a tiny profit, and invested in Walton coin instead.

FYeah - September 9, 2017, 1:02 pm

What is everyone thoughts on BNB, its been hovering around \$0.95 all day.. OMG is to be added on Binance in the next couple of days, reckon the extra volume that will pull in will drive up the price again?

I fully believe in this coin , but I think the hype is gone so don't join to make short term profits. I'm holding til December. Hopefully it will be \$4-5

It almost hit \$3 a bit before the bad China news started coming in, so I feel like this coin has a promising long term future. ?

Yeah China FUD is annoying , they won't get shut down that's a bunch of uninformed idiots spreading those rumours around. The entire ICO shit that's not allowed anymore is actually a pretty big deal though, hopefully it's only temporarily for Binance. If they're ever allowed to do that again I expect to see a huge price increase.

Glad to see it climbing again, hopefully with the FUD passing and the new coins they'll be adding to the exchange soon, BNB may start doing well like before.

Market cap is back over \$100M and it's started to climb a good bit from .90c yesterday.

It'll dip below \$1 again, it's so volatile. I think it will be at \$1.50+ soon though.

I really hope that this coins starts going up since it really is a great exchange and the fees with BNB are so low...

Përkan777 - September 25, 2017, 8:37 am

Binance is adding kyber tomorrow.

etherdelta and liqui sites fell under the load since kyber is so hot right now. It will bring significant volume to binance and with binance volume up BNB price goes up. At this price BNB is a steal.

What is the purpose of the coin other than paying for fees on the exchange? I know they buy back and burn but is that all? I don't believe it holds any real value. Doesn't mean you can't profit on the trends though

?uncho - October 27, 2017, 1:09 pm

CZ the CEO of Binance has addressed on both Slack and Telegram that they are not a Chinese exchange therefore they are not under China's scrutiny or regulations.

They had an issue with the some of their listings because they were Chinese ICO coins but once those coins either got delisted or had to follow the strict refund guidelines business went on as usual.

Not anytime soon i think for the simple fact that kucoin is now out. In my honest opinion i would suggest buying kucoin over binance coin because kucoin is newer and it has a lower price. I believe a lot of the trading volume on binance will end up going to kucoin when more people end up being aware of it. I bought in at \$0.80. <https://coinmarketcap.com/currencies/kucoin/> Then after kucoin goes up you can sell and buy binance coin if you want but the hype for binance coin is gone atm in my opinion.
