Tool Official download link :

<http://securityxploded.org/download/BrowserPasswordDump.zip>

Quasar RAT official download link:

<https://github.com/quasar/QuasarRAT/releases>

Tutorial BIG images [\(Click to View\)](#)

Open file manager.

Open any directory.

Upload tool to the folder ! | In this situation BrowserPasswordDump.exe is named: 01.exe

Open directory in remote shell.

Execute command line: filename.exe -f log.txt | In this situation 01.exe -f log.txt

Close remote shell.

Refresh.

Download log.txt

Delete tool.exe and log.txt | In this situation 01.exe and log.txt

Go to transfers/open download folder.

Done, you have all saved passwords in log.txt file.

Quasar is opensourced so you could always update it/add that function!

Anyway nice tutorial
