Decided, fuck it, going all in NEO at 20\$ last night.

Purchased 2085 NEO

Sold at \$31 or something each

Went from 2085*20 (About 41k\$)

To

OLD THREAD.

Not sure why someone bumped this.

Wow, that's good amount of money! Good job. I sold all my antshares when the price was \$8, I sold about 100 antshares so i can exchange to Stratis and look... Stratis is \$6 right now , almost same price, NEO to the moon...

Definitely do not go all in, it's more for smaller portfolios. You invested in Binance and it did not go well but good job.

How do you speculate and decide what to invest into?

Money Man - September 7, 2017, 9:36 am

wouldve done the exact same but actually hold my NEO.

NEO has a very good future ahead of itself. regardless, well done mate.

Nice earnings, I haven't looked into NEO at all but when the whole recent China ICO ban happened, were people saying it'd make NEO dead? Could be thinking of another coin.

THE NORTH FACE - September 7, 2017, 9:49 pm

You and your incredibly risky investments haha. If I had some decent capital, id be a little more risky. Maybe this winter sometime
