Thread: [Best anti virus/Malware fighters](#)

SoulnPain - September 7, 2017, 3:06 pm

Hi

What are the best anti virus / malware programs

Thanks

QQ Spitfire - September 7, 2017, 3:30 pm

Malware Bytes

Avast

Bit Defender (I can vouch for it)

I've also heard people use Hitman

John Player Special - September 7, 2017, 3:31 pm

i recommend comodo and mbam. comodo on paranoid.

Black Cat - September 7, 2017, 3:54 pm

malwarebytes for scanning and 360 total security for runtime/scantime always scanning with a lot other features including sandbox

That should cover 99.9% of any viruses and malware around

That kind of suggestion always makes me laugh. 99.9% of users don't know what COMODO'S HIPS notifications are and will allow everything, which basically defeats the purpose of having an HIPS in the 1st place.

imanode - September 7, 2017, 10:29 pm

Premium/Paid: Kaspersky, Emsisoft or ESET

Free: avast!, Avira, or Malwarebytes (Malwarebytes can be used with another AV as it is a companion anti-malware software).

This is your go to guy for Malware help. Has helped me in the past and hasn't failed me yet.

Ecologist - September 11, 2017, 2:21 pm

AVIRA

Malware Bytes

Avast

Bit Defender

aerohacker - September 12, 2017, 3:17 pm

Kaspersky Internet Security + Malwarebytes Premium + Zemana Antimalware + Emsisoft Antimalware + Hitman Pro running together is overkill or i'll be fine?!

The PC specs it's not a problem.

Panda-I_DoWn - September 12, 2017, 4:15 pm

Bit Defender
Malwarebytes
Hitman Pro

5chn4pp - September 13, 2017, 3:48 am

The PC specs it's not a problem.

Remove hitmanpro, emsisoft and zemana and you should be good.

ImZero - September 14, 2017, 7:20 am

Personally I run ESET NOD 32 + MBAM and it'ss working pretty well for me.
